Agenda item 10f.
Capacity development needs assessment

Mr. Daniel Eshetie, UNSD

14th Meeting of the IAEG-SDGs

25 October 2023

Capacity development needs assessment

➢ One of the 6 sections of the 2023 IAEG-SDGS annual Good Practices Questionnaire on SDG monitoring, Data Disaggregation and Data Gaps includes:

❖ **Capacity building needs for SDG monitoring (revised in 2023)**

- Coordination and strategic leadership on data for sustainable development within the national data ecosystem

- Assessing data availability and gaps for SDG monitoring within the country

- Strengthening of basic statistical activities and programmes such as population censuses, household surveys and administrative data, with particular focus on addressing the monitoring needs of the 2030 Agenda

- SDG and/or Voluntary National Review (VNR) reporting

- Producing more disaggregated data for SDG indicators, especially for marginalized population groups

- Dissemination, visualization, and use of sustainable development data

- Multi-stakeholder partnerships for sustainable development data

- Innovation and modernisation of national statistical systems with particular focus on addressing the monitoring needs of the 2030 agenda, please provide specific areas that you need support on:

- Other (please specify)

Respondents

➢ As of 20 October 2023, 64 countries provided a response to the section on the revised capacity building needs for SDG monitoring

➢ Deadline to be extended to 30 November 2023

➢ 3 Regional commissions provided inputs
