

UN-HABITAT

SDG Target 11c: alternative indicator proposal

Robert Ndugwa
Chief, Data and Analytics, UN-Habitat

24 Oct 2023

Local Materials for Sustainable Urban Development

Goal 11: Make cities and human settlements inclusive, safe, resilient and sustainable

Target 11c: Support least developed countries, including through financial and technical assistance, in building sustainable and resilient buildings utilizing local materials.

Target 11c targets the use of local sustainable building materials in the construction sector of least developing countries. This approach aims to enhance the local economy and reduce the environmental impact by utilizing locally produced resources.

~~11.c.1: Proportion of financial support to the least developed countries that is allocated to the construction and retrofitting of sustainable, resilient and resource-efficient buildings utilizing local materials~~

Interconnection with other SDG indicators

11.2

Target 11.2: by 2030, provide access to safe, affordable, accessible and sustainable transport systems for all, improving road safety, notably by expanding public transport, with special attention to the needs of those in vulnerable situations, women, children, persons with disabilities and older persons

11.3

Target 11.3: by 2030 enhance inclusive and sustainable urbanization and capacities for participatory, integrated and sustainable human settlement planning and management in all countries

11.6

Target 11.6: by 2030, reduce the adverse per capita environmental impact of cities, including by paying special attention to air quality, municipal and other waste management

11.7

Target 11.7: by 2030, provide universal access to safe, inclusive and accessible, green and public spaces, particularly for women and children, older persons and persons with disabilities

- Industry
- Innovation
- Infrastructure

Ecological Friendliness of Local Materials

Ecological Sustainability

Reduces ecological impact through sustainable resource extraction and local sourcing, promoting environmental responsibility

Economic Growth

Boosts local economies and job creation in LDCs, contributing to economic sustainability

Affordability

Lowers housing costs by reducing reliance on imported materials, making housing more accessible

Climate Resilience

Enhances building resilience by using materials suited to local climate conditions

Cultural Adequacy

Supports cultural sustainability by incorporating traditional local materials in construction

Green Job Creation

Facilitates greener job opportunities in the construction industry, promoting economic and environmental sustainability

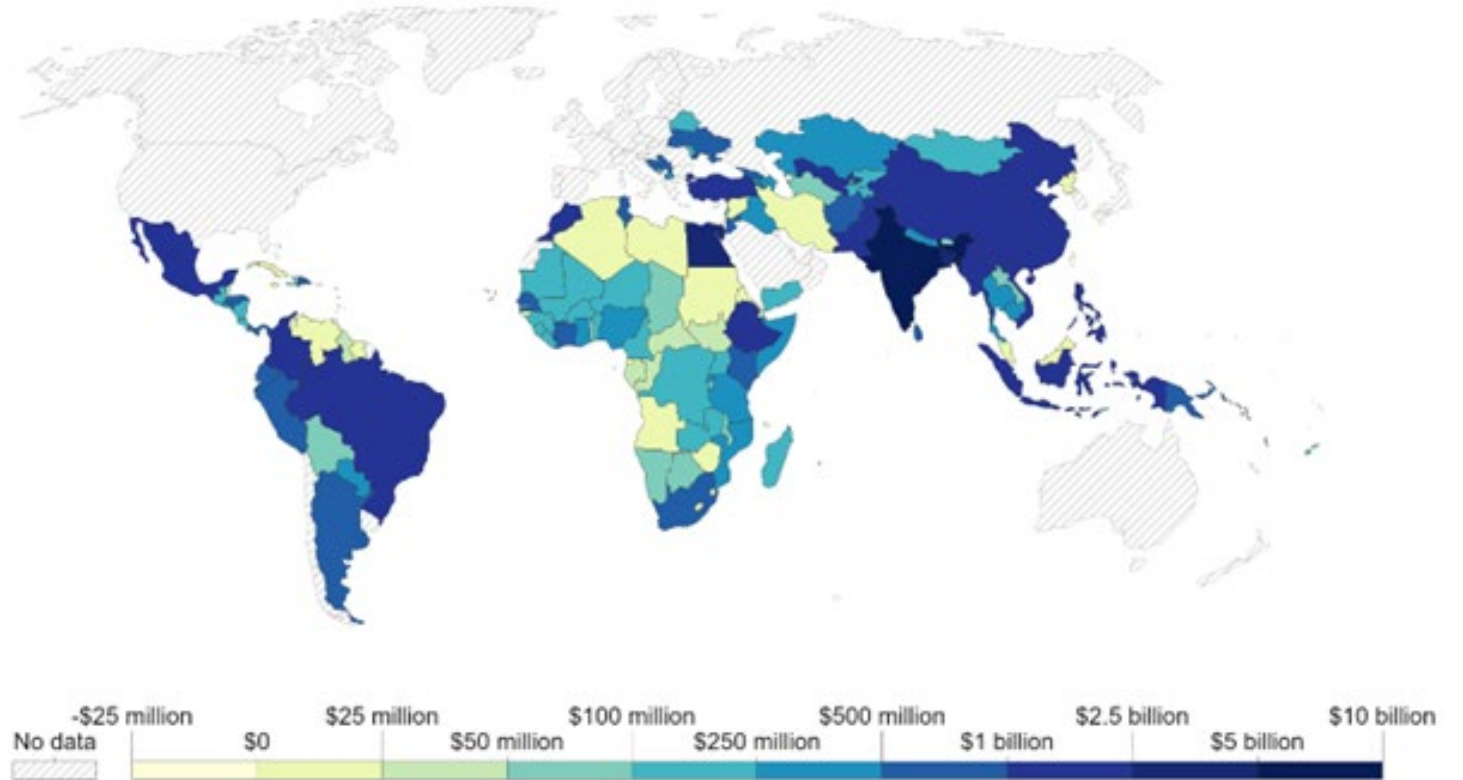

Financing for infrastructure development

- There is a lack of direct Official Development Assistance (ODA) financing for the production of local building materials.
- Most funds allocated to the construction sector are channeled indirectly through sectors like education, health, and industry.

Total official flows for infrastructure, by recipient, 2020

Total official development assistance (ODA) and other official flows from all donors in support of infrastructure. This data is adjusted for inflation (constant 2020 US\$).

Proposed indicator

Indicator: Official development assistance (ODA) in support of infrastructure

Data availability

82 countries see
<https://data.oecd.org/oda/oda-by-sector.htm>

Methodology

Official development assistance (ODA) by sector is defined as the distribution of bilateral ODA commitments by economic sector. It does not refer to the type of goods or services provided.

These data are aggregates of individual projects notified under the Creditor Reporting System, supplemented by reporting on the sectoral distribution of technical co-operation, and on actual disbursements of food and emergency aid.

This indicator is measured in million USD constant prices, using 2021 as the base year.

References

OECD (2023), ODA by sector (indicator). doi: 10.1787/a5a1f674-en (Accessed on 12 October 2023)

Proposed Way Forward

UN-Habitat proposes to further develop a comprehensive methodology within the next 6 months and provide a substantial proposal for consideration in the 2025 Comprehensive Review process.

OECD and other partners are potential co-custodians. Plan is to organize an expert group meeting and consultations for detailing methodology and initial data tables by June 2024.
