Data For Sustainable Development: **Introducing UNFPA's Population Data Portal 2.0**

Mengjia Liang, UNFPA

14th Meeting of the Inter-Agency and Expert Group on Sustainable Development Goal Indicators

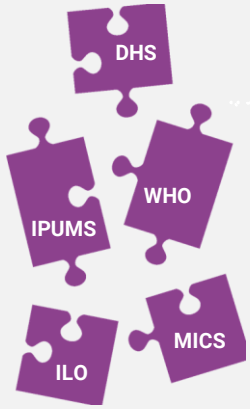
25 October 2023

THE POPULATION DATA PORTAL
Data for action!

What PDP Offers

Our history → **Where PDP takes us**

Inputs → **Processing** → **Outputs**



Traditional Data

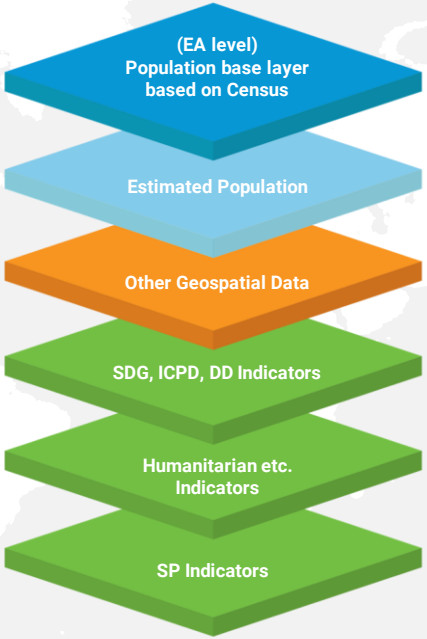
- Census
- Sample surveys (e.g. DHS, MICS)
- Administrative boundaries/EAs/ settlements

Non-traditional Data

- Satellite imagery/ Pop estimates

Other Geospatial Data

- Roads, elevation, land use, settlement, hospitals, schools, environment, etc.



Use-case Approach

- Tracking SDGs and ICPD, ensure LNOB
- PDP for country programming – with program data, and GIS analysis
- Latest population census data
- Support to countries

Sharing Country Data

Step 1	Share ***Country Data Sharing Package***	**PDP global team to share the country data sharing package including detailed guidance and template; country team to review the current data scope in the global portal.**
Step 2	Identify potential country data sources	**Potential data sources: Priority will be given to the 2020 round of census, country-specific demographic, health, gender and social surveys; other data sources such as CRVS, HMIS/DHIS2, facility-based data, and admin data may be considered.**
Step 3	Agreement on data storage, sharing and other considerations	**In collaboration with the PDP global team, country team to determine the specifics of data sharing, including the format (microdata or aggregated data), storage (potentially using the secure, cloud-based system hosted by Brindisi), and decisions on data publishing (all data or only a subset), among others.**
Step 4	Submit data using Country Data Sharing template	**Country team to submit data using the standard template, matching boundary data /shapefile must be shared for mapping purposes; technical assistance is available upon request.**
Step 5	QA and data ingestion to PDP	**PDP global team to conduct QA and load data into the PDP core database. Administrative privileges may be extended to RO or CO focal points interested in further engagement with PDP database management, enabling them to continue updating their respective data sets.**
