# **III. DIFFICULTIES AND CHALLENGES IN IMPLEMENTING VSDGIs**

# Some difficulties and challenges in implementing VSDGIs

Inadequate data and resources for disaggregations for vulnerable groups

Many new indicators require the data collection by non-traditional such as big data, satellite data etc.

Current national statistics does meet the data requirement

Data sharing between GSO and other ministries, line ministries is limited.

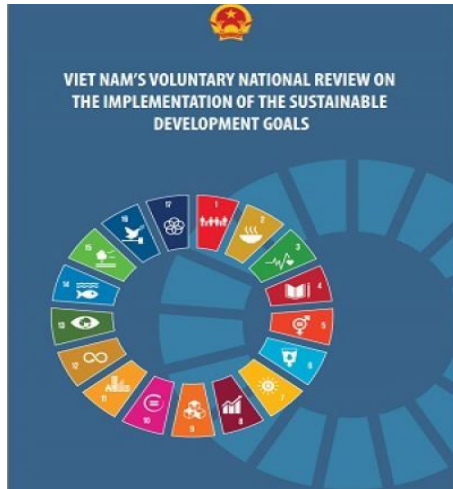

IT application in data collection is still limited

Human resources/staff working in statistics at ministries and provinces do not satisfy the new data collection/processing skills
