Monitoring SDG 1.2.2
- Results and Steps Forward -

Mark Hereward | Kazusa Yoshimura | Nobuo Yoshida

Collected indicators

1) *Official multidimensional poverty headcount (% of population)*
   - The percentage of people who are multidimensionally poor, further disaggregated by sex and age

2) *Average number of deprivations (intensity)*
   - The average percentage of dimensions in which poor people are deprived

3) *Official multidimensional poverty headcount (% of total households)*
   - The percentage of households who are multidimensionally poor

4) *Child-specific multidimensional poverty*
   - The percentage of children who are multidimensionally poor (measured at the individual child level)

SDG 1.2.2 data

Results of monitoring SDG 1.2.2

- The survey covered **189** countries across the world, and it was found that **76** countries have some kinds of multidimensional poverty measurement in the last 10 years

- Out of 76 countries, **47** countries have been confirmed by the NSO officers

Steps forward

- Continue to follow-up the remaining 29 countries to be included in the next update in September

- Collect information on those countries who will release the new data by September

- Modify data collection tool so that data can be collected at urban and rural levels as well

- Eventually, the goal is to move to the system in which country inserts number directly
