Session 6.1: National data reporting platforms

United Kingdom

Fiona Dawe

Office for National Statistics

UK National Reporting Platform

UK National Reporting Platform

- Open source, free to use

- Developed in partnership with US Govt and CODE

Adopted by: **Rwanda, Ghana, Kyrgyzstan, Armenia, Kazakhstan, Namibia, Jamaica, Poland, Germany**

- 75% of indicators have at least headline data

- Challenge:

  - Sourcing the missing 25% of indicators

 - Disaggregation

  - Trend data

Policy makers needs…

- Data that tells a story…

- Global vs National…

How can the NRP help policy makers?

- Co-ordinated response to the SDGs across Government

- Disaggregation and inter-sectionality

Goal 3.1.1 Maternal mortality ratio by ethnicity

Challenges for the NRP

- How do we make the NRP the go to data source?

- Data in the NRP and VNR need to be as close as possible

- Maintaining the relationships with statisticians across Government Departments
