About CAPMAS

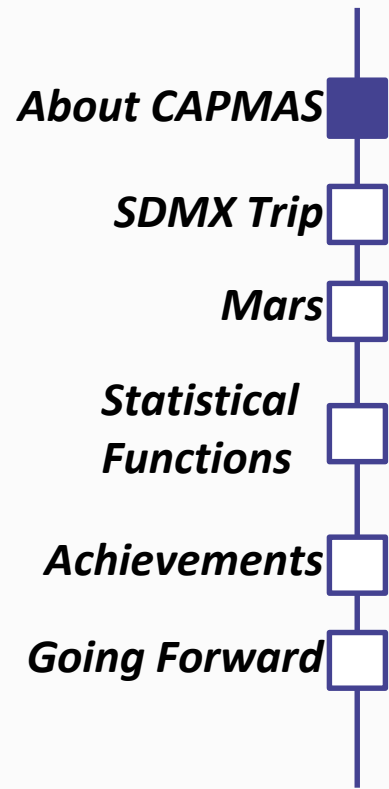

Central Agency for Public Mobilization and Statistics

Who We are?

✓ The Central Agency for Public Mobilization and Statistics is the official national body that provides all state agencies with reliable data and statistics that decision-makers, as well as stakeholders and researchers in all fields rely on, So its roles are to:

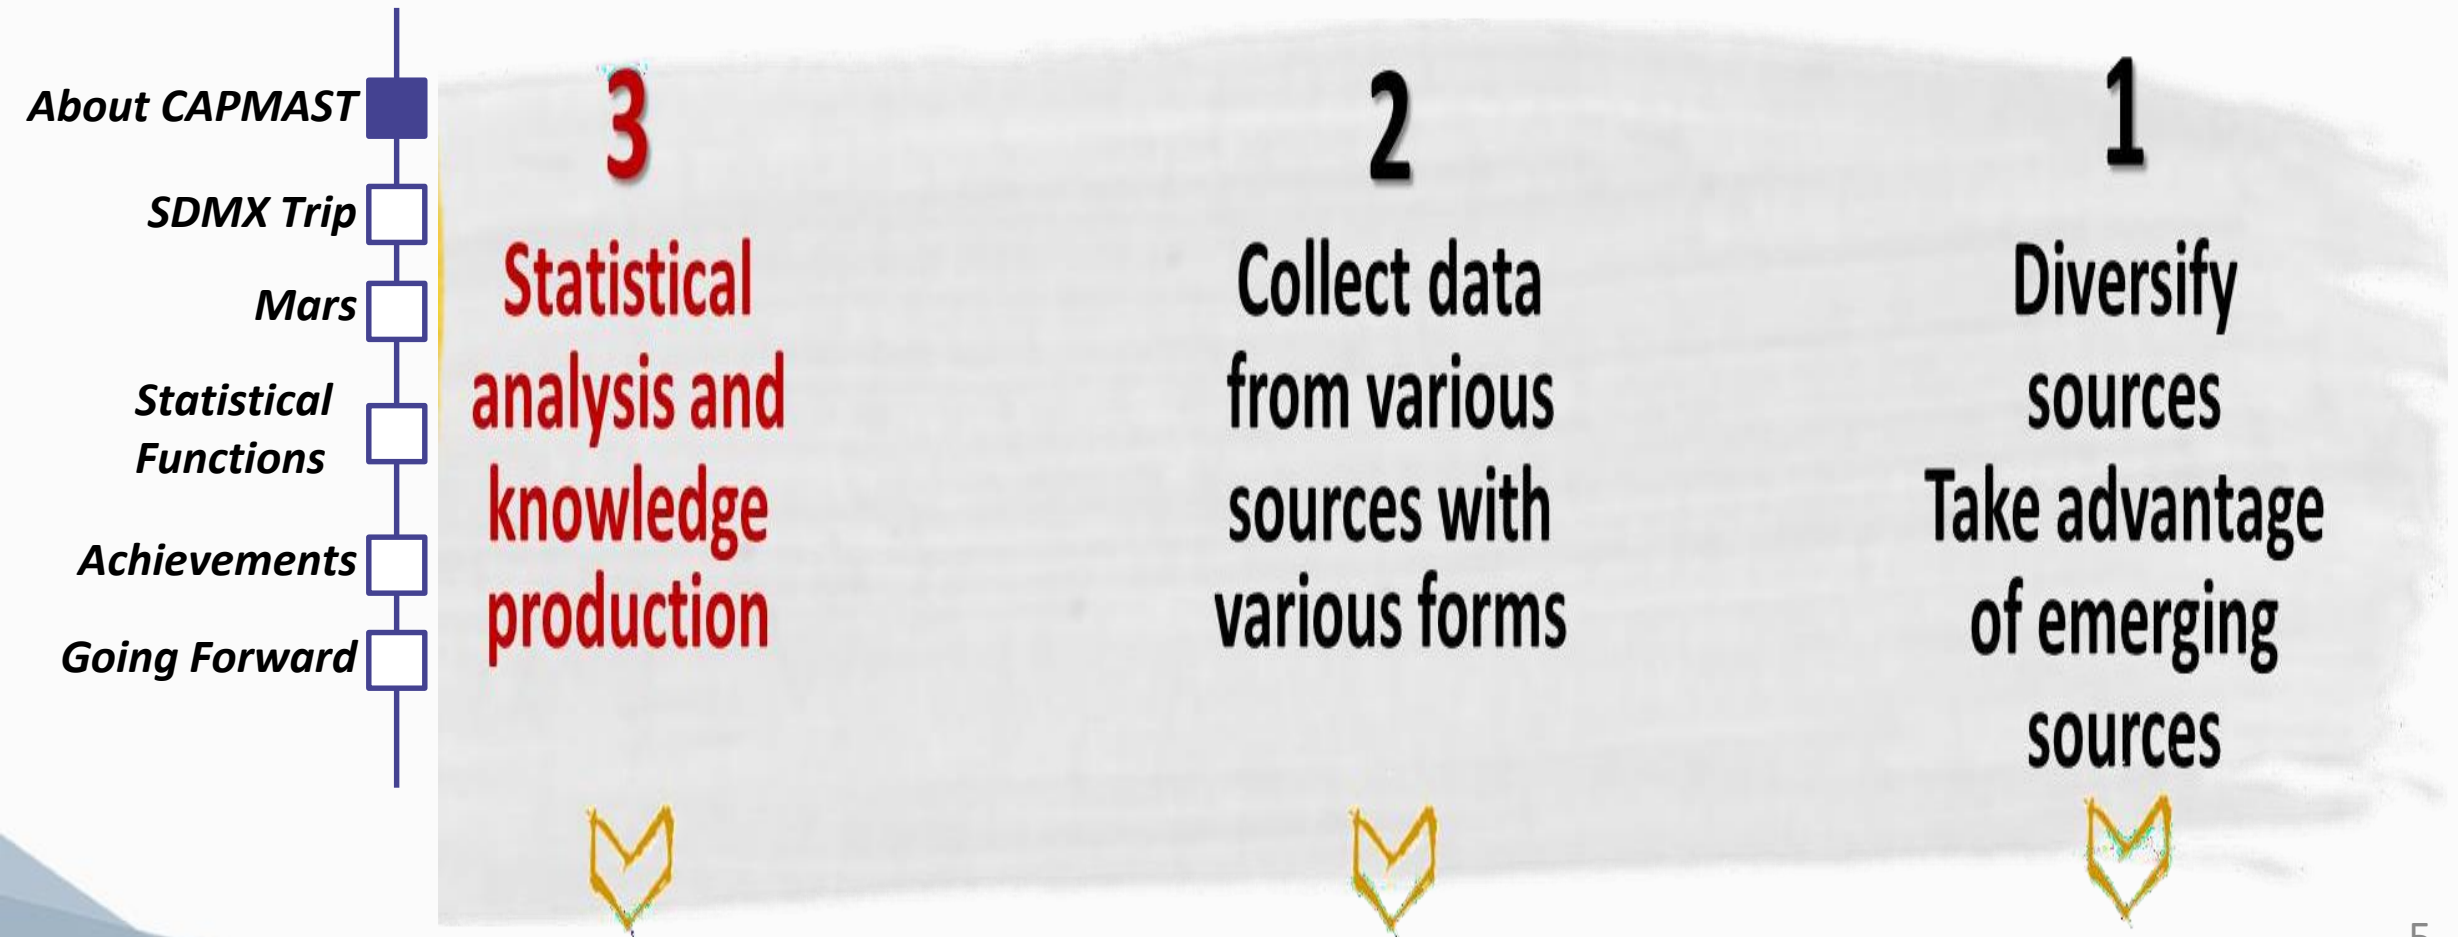

- **Develop, coordinate and harmonize statistics** with all state agencies.
- **Provide the high quality** statistical and knowledge products and services necessary to support the Agenda2030 with all initiatives.
- **Support monitoring the implementation** of the SDGs with all international organization.
- **Highlight the gaps in data** to make the process of development cover all the country levels.
- **Provide up-to-date data for all through its site.**

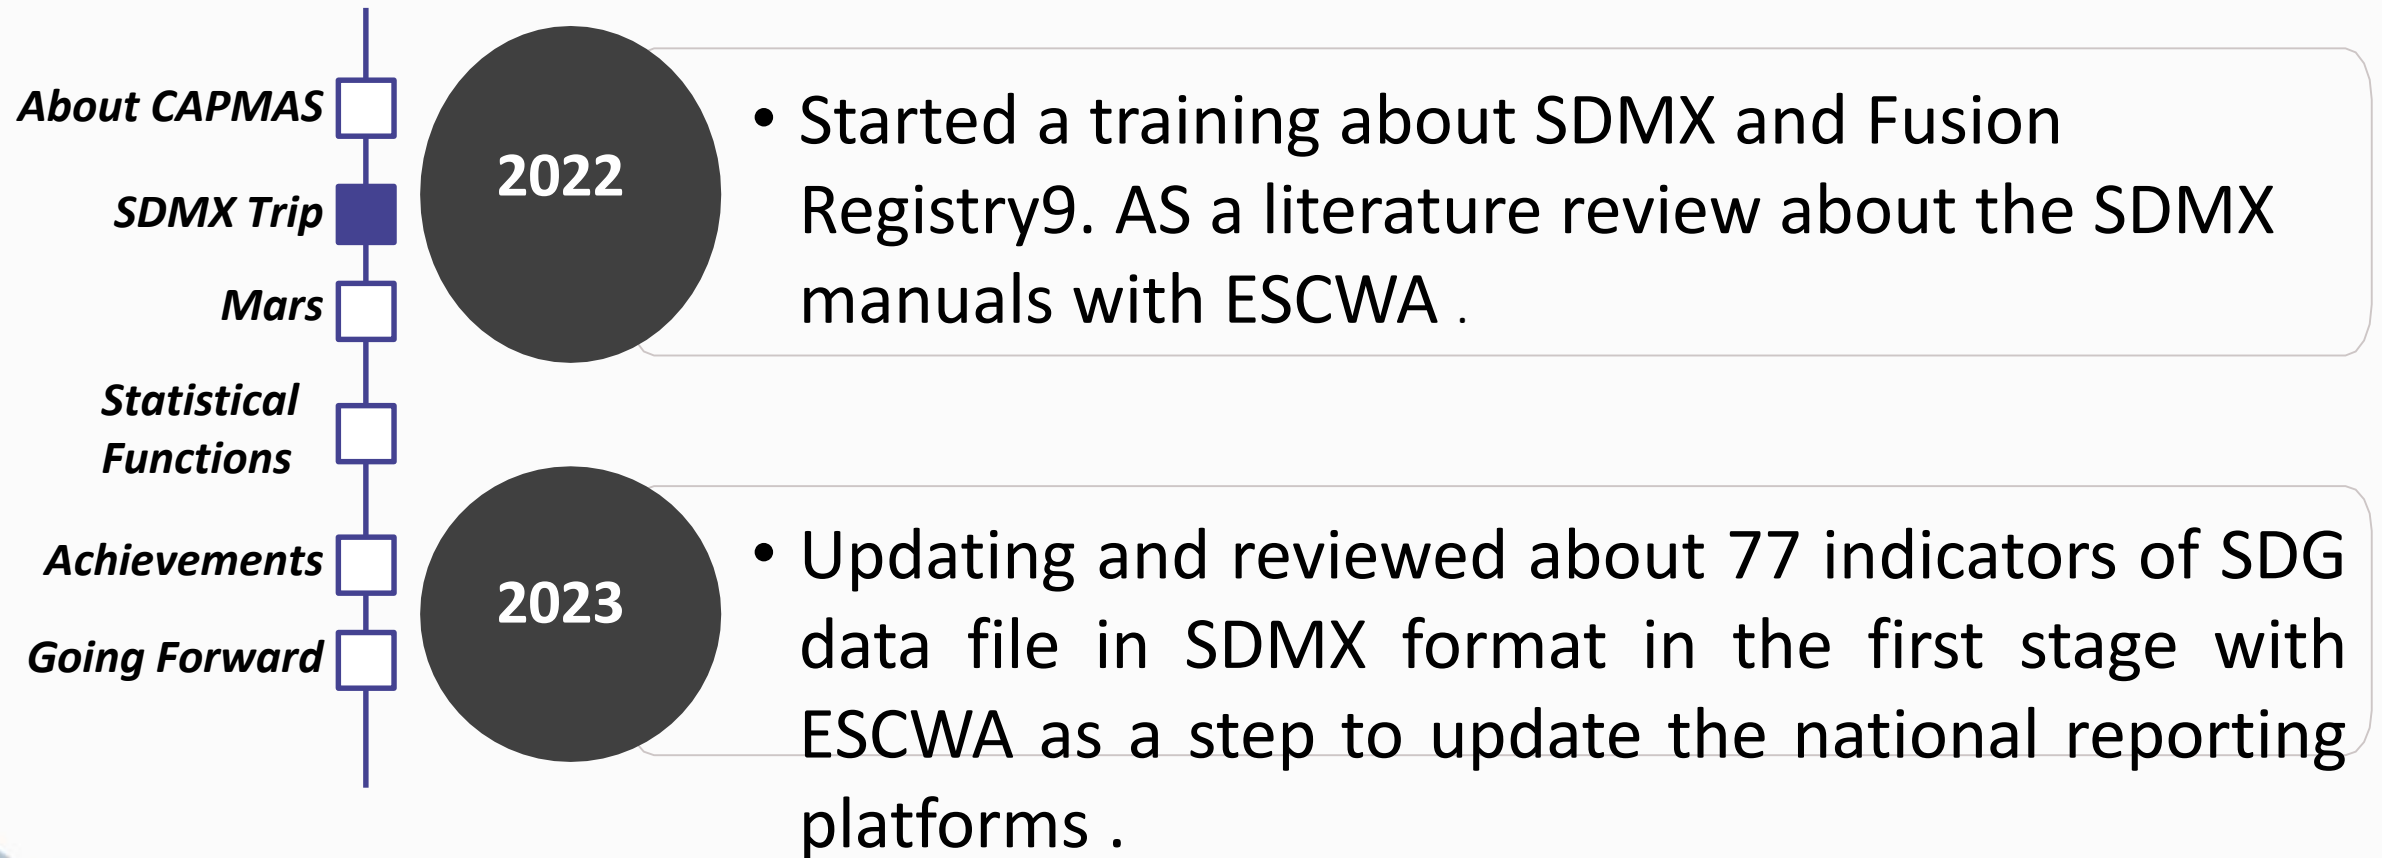

A cooperative partnership between the **National Statistical Systems** and **CAPMAS**, powered by the Standing Committee for Statistical Affairs

CAPMAS statistical strategy

SDMX Trip in CAPMAS

What is SDMX?

Statistical **D**ata and **M**etadata e**X**change (**SDMX**)

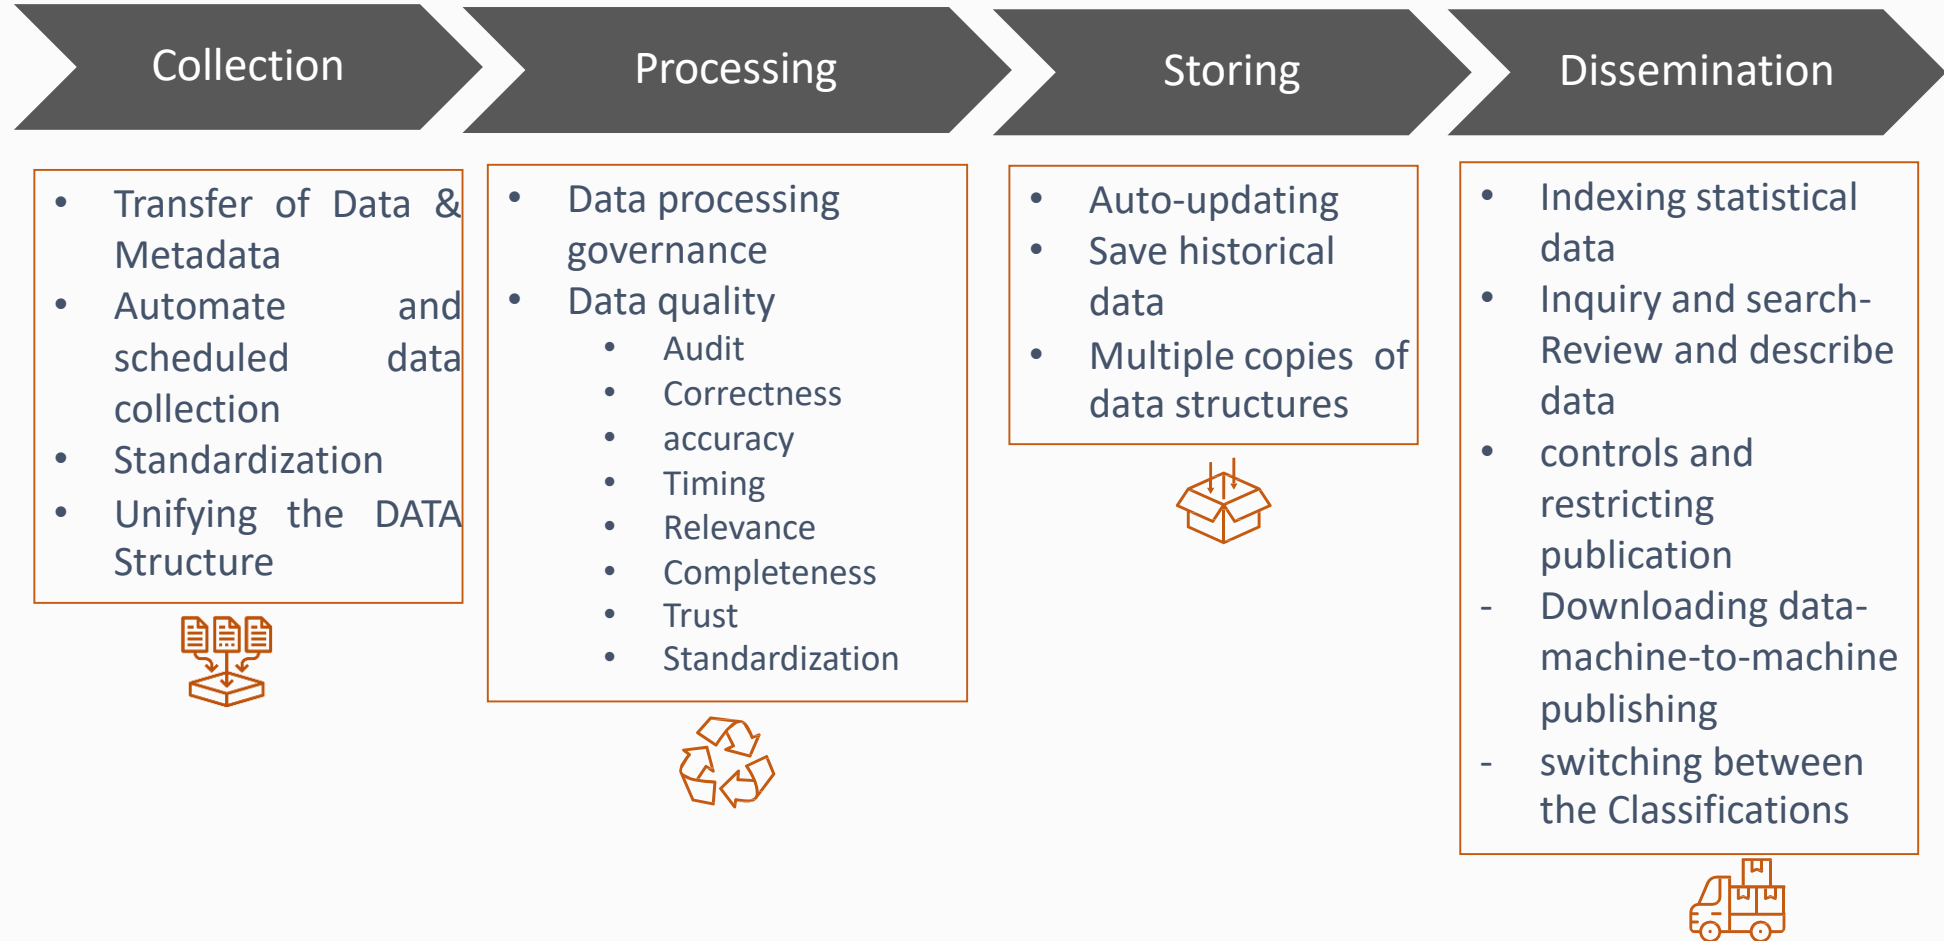

- About CAPMAS*
- SDMX Trip*
- Mars*
- Statistical Functions*
- Achievements*
- Going Forward*

- **SDMX** is considered the international language of statistics, which effectively contributes to unifying the form and structure of statistical data and data until it has become an international standard and approved by obtaining the ISO 8 certificate.

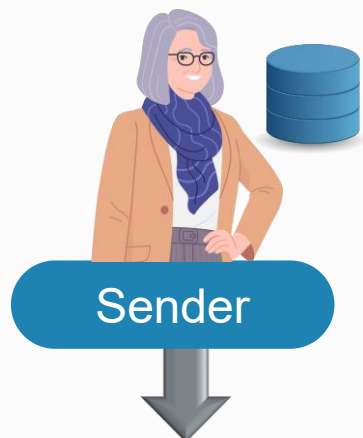

Statistical Data and Metadata eXchange (SDMX)

What Makes Statistical Messages Exchange Effective?

Country	Percentage of women in workforce	Female share in part-time employment	Women's wage relative to men	Percentage of women legislators and managers	Percentage of women in tertiary education	Percentage of girls in tertiary education	Percentage of women in tertiary education
Germany	46	79	76	38	33	47 (2010)	-
Netherlands	44	75	83	27	38	48 (2010)	52 (2010)
Norway	47	78	80	31	46	48 (2010)	61 (2010)
Spain	44	77	-	32	36	40 (2010)	54 (2010)
UK	46	75	83	35	22	40 (2010)	57 (2010)
USA	46	-	-	43	17	52 (2010)	57 (2010)

Numbers in this table are based on information from the United Nations Statistics Division, which is freely available at <http://www.unstats.un.org/indicators/indicatorsmain.do>

Statistical Concept	Description	Concept ID	Representation
Statistical Indicator	A data element (or a set of characteristics) used to make meaningful comparisons of data	INDICATOR	?
Reference Area	The country or region which an observation refers to	REF_AREA	CL_AREA
Time Period	Years in four digit notation	TIME_PERIOD	Observational Time Period
Frequency of observation	For all the cases is yearly	FREQUENCY	CL_FREQ
Sex	State of being male or female	SEX	CL_SEX
Age	The length of time a person has lived	AGE	CL_AGE
Unit of Measure	Percentage	UNIT_MEASURE	CL_UNIT_MEASURE
Observation Status	All the observations are estimates	OBS_STATUS	CL_OBS_STATUS
Decimals	All observations are represented with one digit	DECIMALS	CL_DECIMALS
Observation Value	The indicator being reported (female share of employment in sector and middle management)	OBS_VALUE	AlphaNumeric

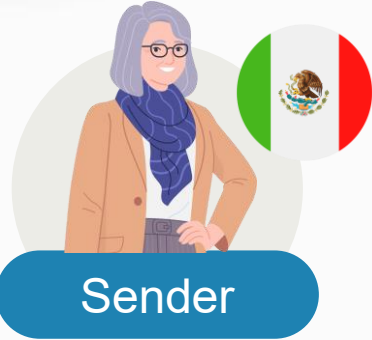

Agreed Common Concepts

Structures with Complete Information

Common Formats

Stable and Predictable Exchange Scheme And Mechanism (Process)

What Are the Problems in the Convention Statistical Messages Exchange?

Message sent:
En 2020 Mexico tenía 126 millones de habitantes, aproximadamente la mitad eran mujeres

Messages not structured properly

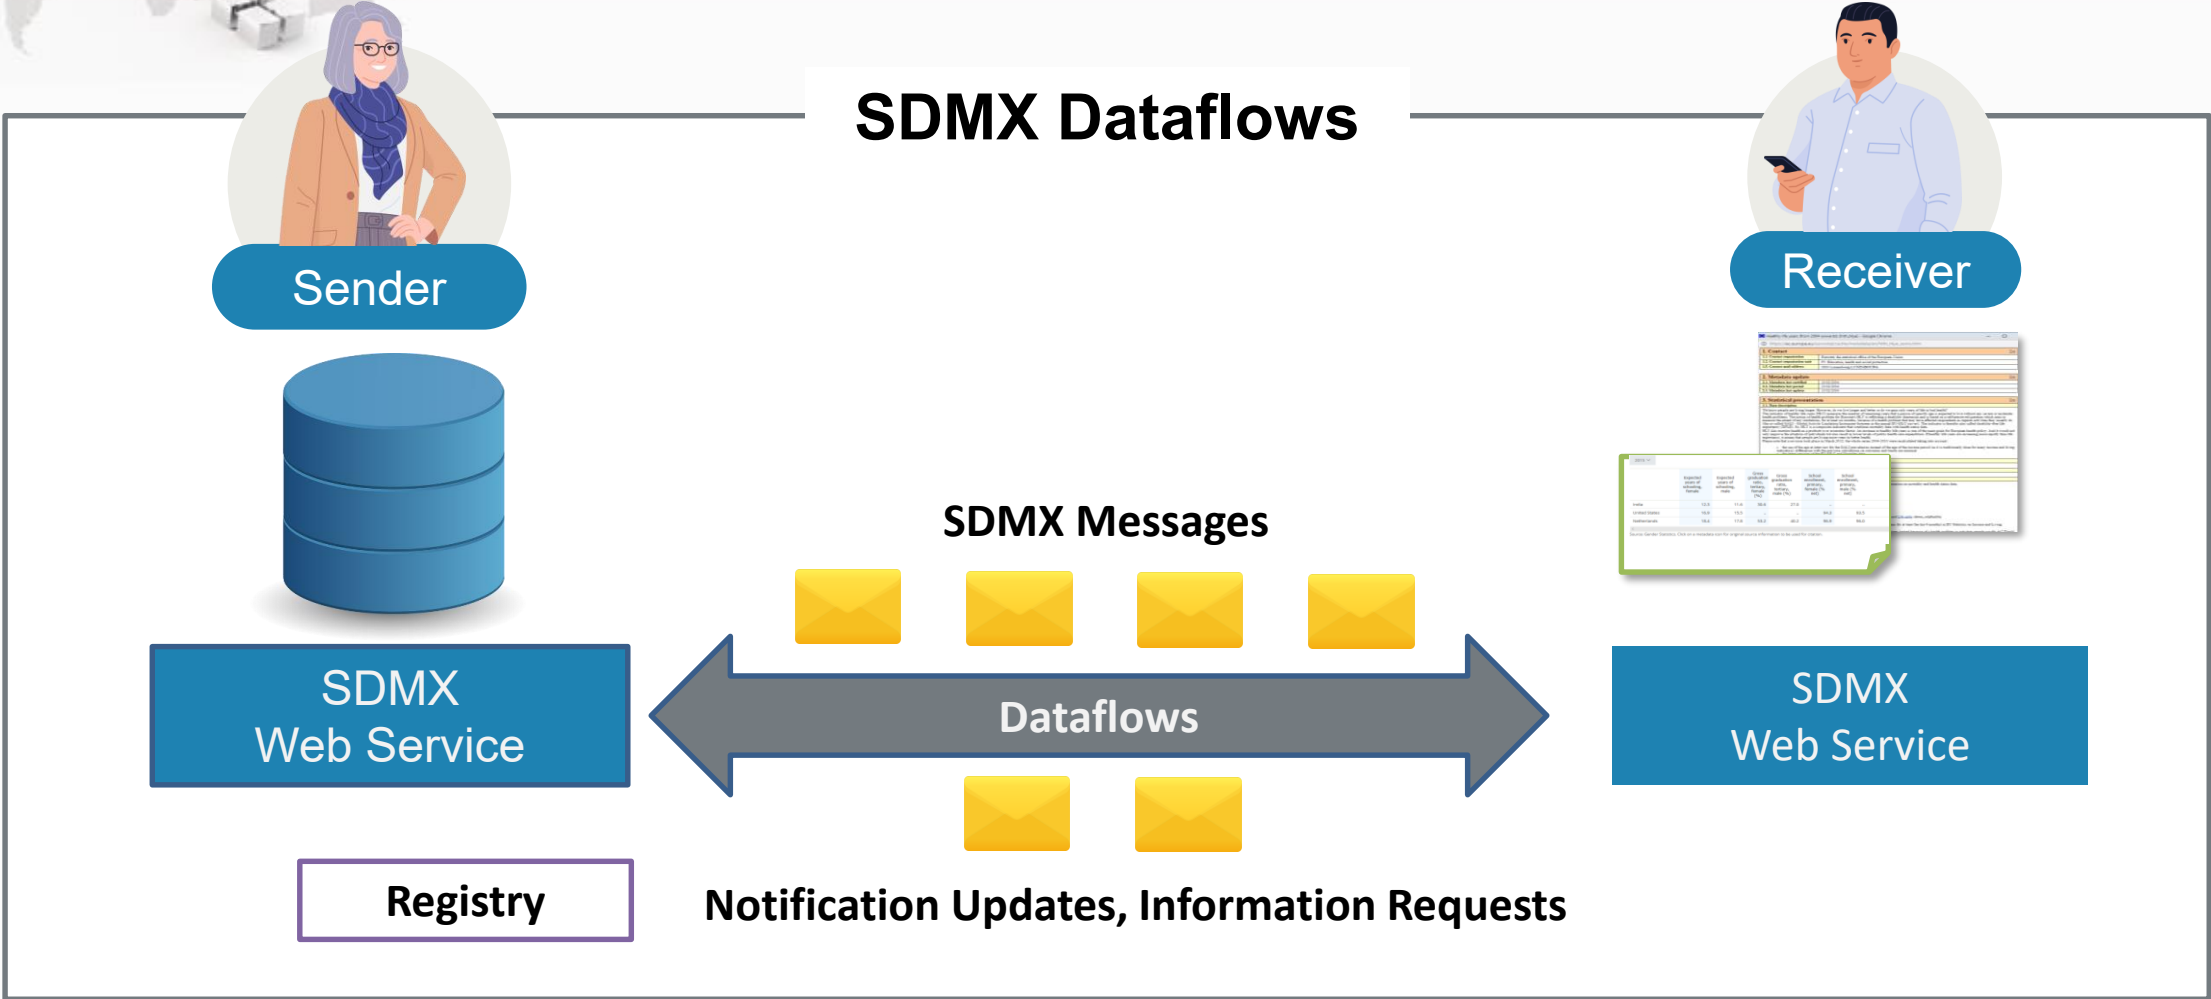

Missing information

Message received:
Mexico had 126 millions of <\$??***"##\$> women
{??==ii**}

Errors caused by information format or channel

Different languages used by sender and receiver

SDMX Statistical Messages Exchange

Overview about MARS Project

MARS: Is a monitoring application for reporting SDGs, which automated data collection, storage and dissemination system by ESCWA.

About CAPMAS

SDMX Trip

Mars

*Statistical
Functions*

Achievements

Going Forward

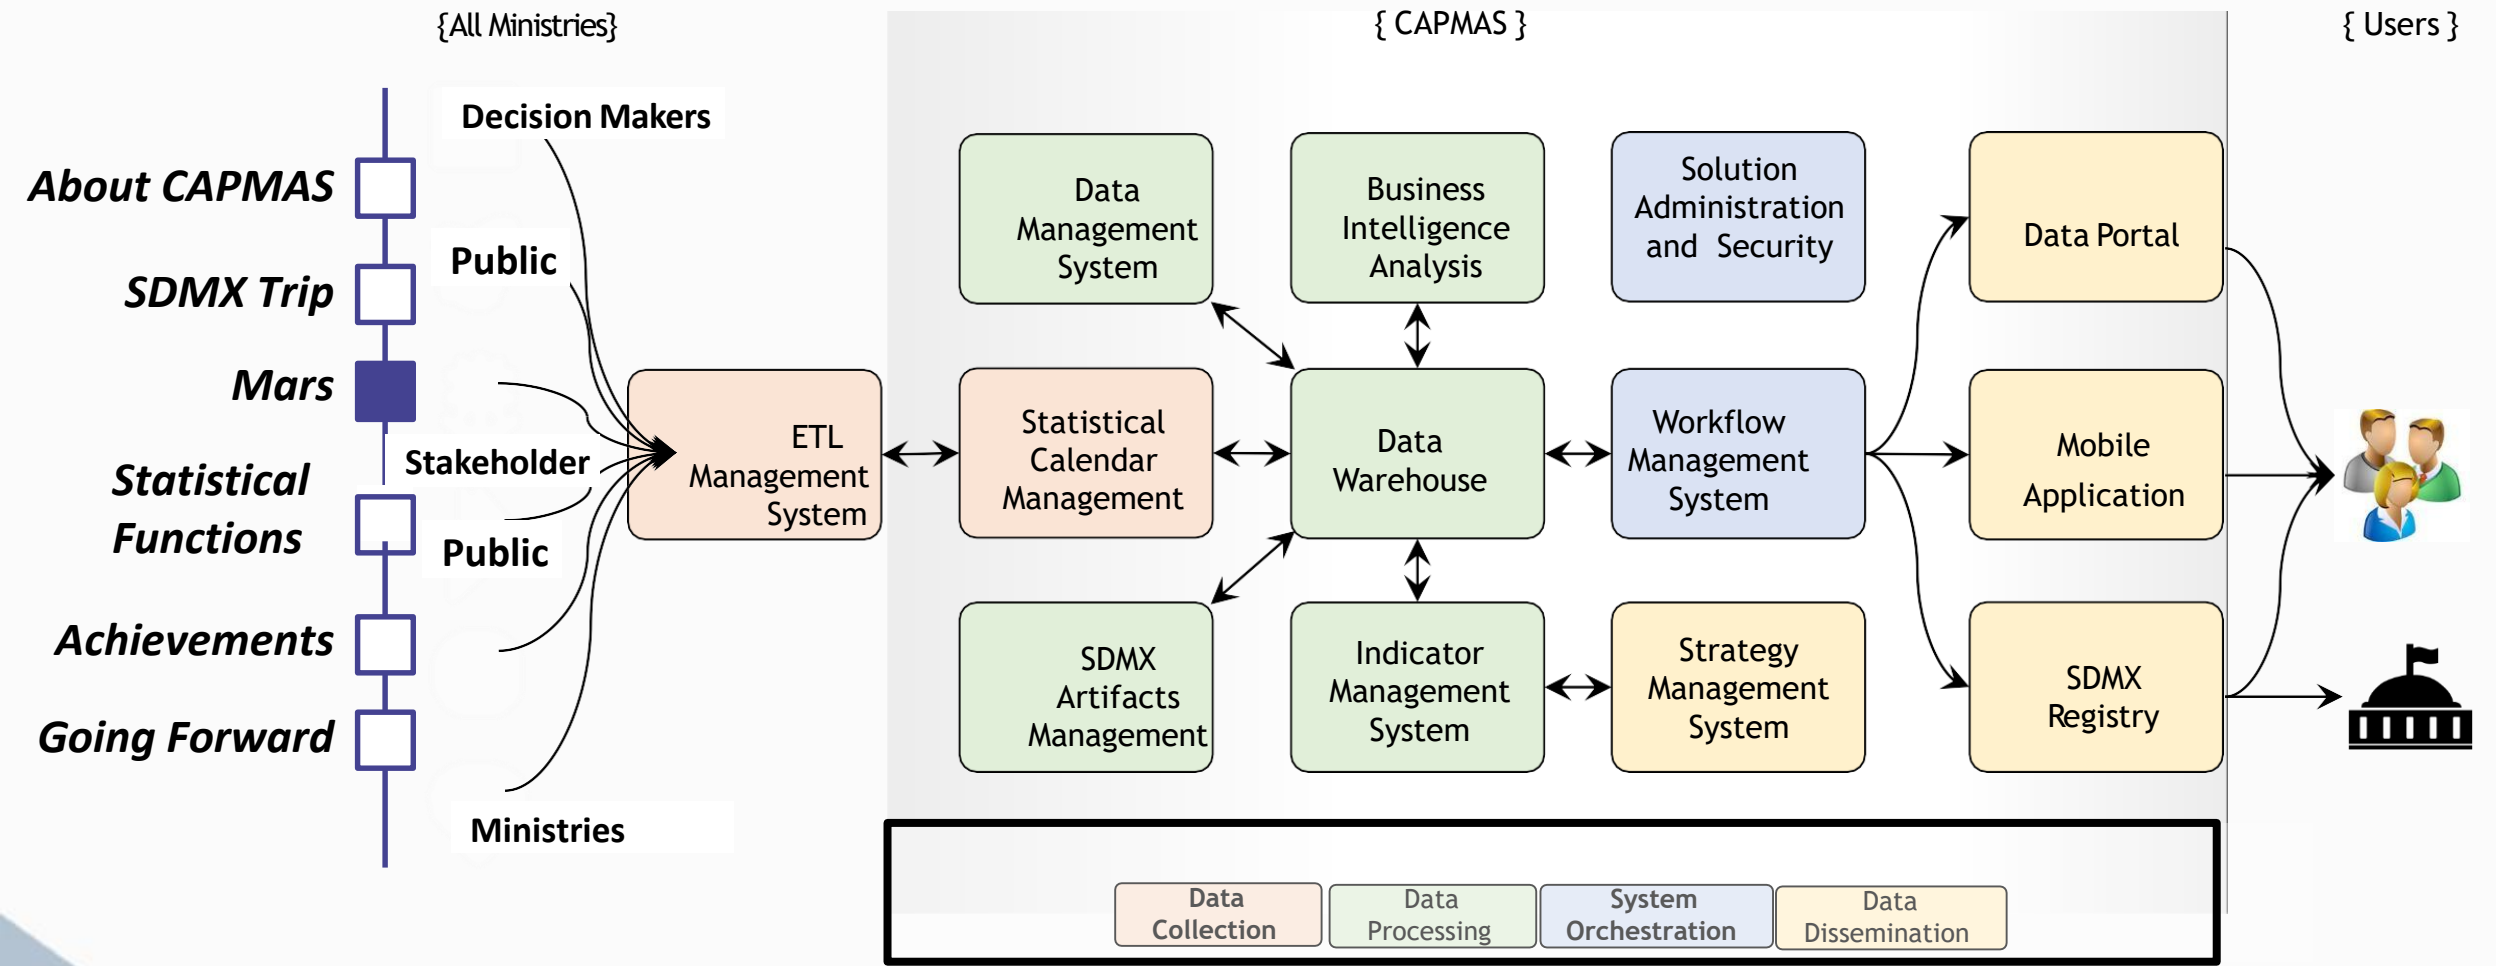

Platform used by CAPMAS as the core practical solution.

Its main functionality to provide “**end-to-end**” official statistics management in response to dynamic internal and external stakeholders needs.

Its delivered a variety of services through the deployment of multiple integrated applications and tools.

Integrated system between CAPMAS and the data source

Mars Platform Components

What is the Impact?

About CAPMAS

SDMX Trip

Mars

Statistical Functions

Achievements

Going Forward

CAPMAS

- ✓ Fully Automated Data Project
- ✓ Fast way of exchange data
- ✓ Centralized data warehouse
- ✓ Measure the strategy indicators
- ✓ Filling the data gaps
- ✓ Cover various statistical topics with the Current resources.

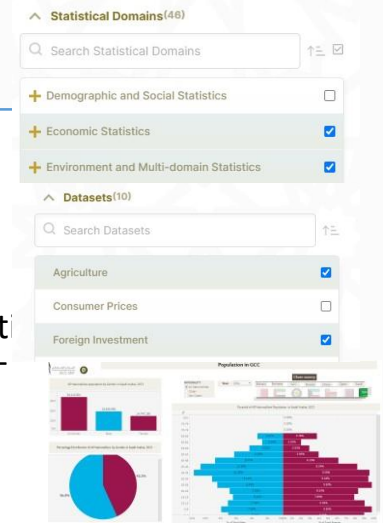

Decision Makers

- ✓ Monitoring Strategy by Create special Dashboard for different topics.

Ministries

Public

- ✓ Easy to search/store data
- ✓ User friendly data portal
- ✓ Select Multi-Datasets from Multi Domains
- ✓ Interactive Dashboard

Employees

- ✓ Promote a culture of data science
- ✓ Simplify the use of the data warehouse
- ✓ Simplify analysis of the data
- ✓ Creation of the Dashboard
- ✓ Dealing with different parts of the system
- ✓ Save time & effort

Statistical Functions

a. Structures Building

Using as a resource
Transmission tables .xlsx

- About CAPMAS
- SDMX Trip
- Mars
- Statistical Functions **1. Data Preparation**
- Achievements
- Going Forward

{ Brainstorming to specify: }

- Dimensions
- Attributes
- Measures
- Code lists
- Frequencies

{ Resulting in }

- Cross-section concepts
- Related section concepts
- Some tables need more than one DSD
- Naming ways of all artefacts and related IDs

Structure Modeling

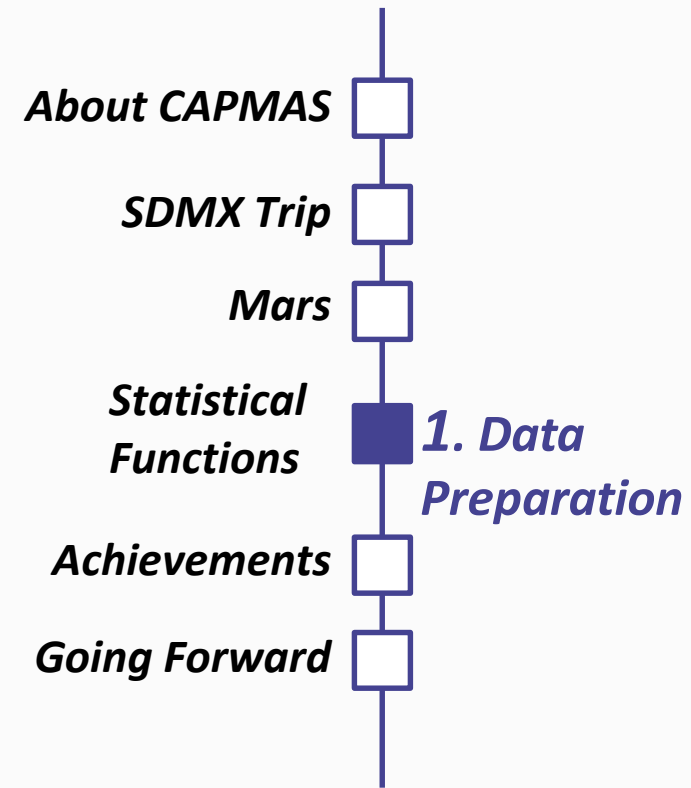

Building **SDMX** artefacts in Fusion Registry

Normalization

- Common Concepts
- Code-lists
- DSDs
- DFs
- Metadata

b. Building three registries to match Egypt needs

Store the original data from the data sources

Validated, Transformed to SDMX

Approved data to be disseminated

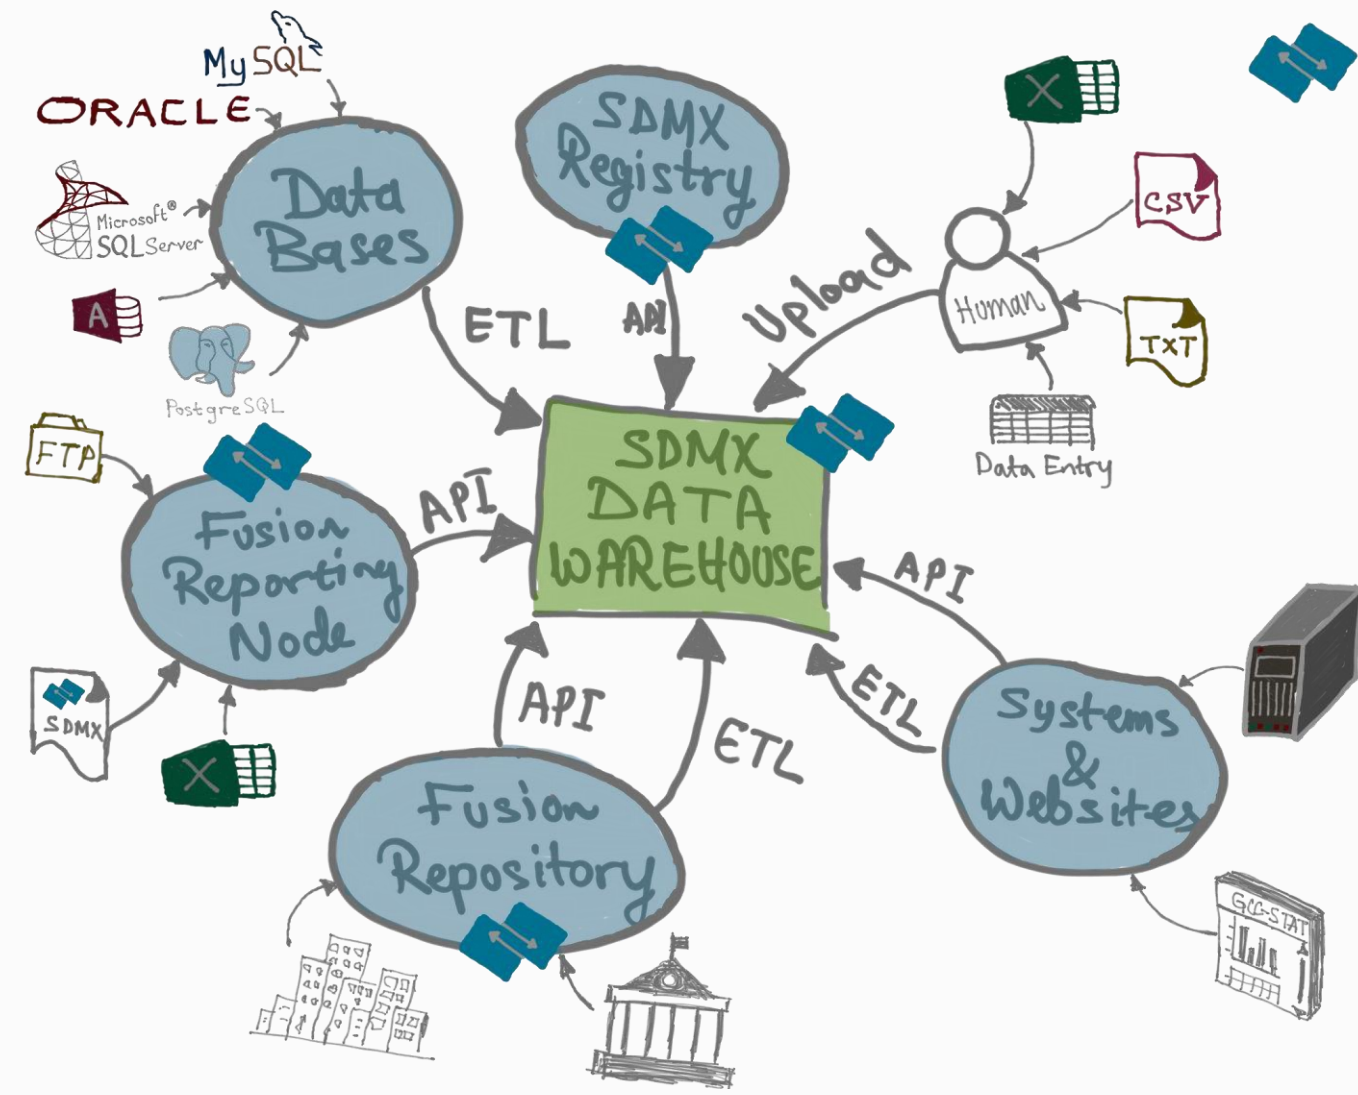

Linking options

- About CAPMAS
- SDMX Trip
- Mars
- Statistical Functions **2. Data Collection**
- Achievements
- Going Forward

2. Data Collection

1 Datasets

linked to dissemination instant (dataset name, description, data, download as different data types).

2 Explorer

Linked Directly to dissemination instant and users can work with data and build their own tables.

3 Dashboards

make dashboards ready using Tableau or superset tools and embed them on the data portals as interactive dashboards.

4 Statistical Demand Management

Linked to dissemination and it is a place where we can build strategy and its goals and indicators are read and updated due to any update in the registry.

About CAPMAS

SDMX Trip

Mars

Statistical
Functions

**3. Data
Dissemination**

Achievements

Going Forward

Achievements

About CAPMAS

- ❑ **Raising the level** of automation of work procedures, controlling governance and powers, and reducing effort, time and cost.

SDMX Trip

- ❑ **Create a updating,** database that is a unified and reliable source.

Mars

Statistical Functions

- ❑ **Building a culture of SDMX** within the CAPMAS statisticians and raising their capabilities.

Achievements

- ❑ **Promote a culture** of SDMX in CAPMAS and other agencies.

Going Forward

- ❑ **Build an integrated solution** that covers the entire statistics functions lifecycle from collection to dissemination.

- ❑ **Ability to transfer data** of large size or different shape and form.

- ❑ **Ease of publishing** which facilitates the process of exchanging data and from machine to machine.

- ❑ **Readiness** to auto connect with any data providers, regardless of their systems or technologies, and to automate and schedule the automatic fetching of statistical and descriptive data.

Mars

Statistical
Functions

Achievements

Going Forward

Strengthening statistical capabilities in CAPMAS

Support & assist in implementing the Statistical system in the SDMX.

Completing the Automation collection process in CAPMAS and covering all the statistical fields.

Continuing using SDMX as a tool in searching for alternative statistical data sources without worrying about their structures.

Thank you for your attention
