United Nations Statistics Division: Demographic Yearbook Questionnaire on Population Estimates Part 2: Metadata

Reporting country: Suriname Reporting year: 2024

1.	Author	organization
	,	- : Jan a

Author organization function: General Bureau of Statistics Suriname (GBS)
2. Timeliness
Date when the provided population estimates were produced: July 2023
Reference dates of the sources of the latest data used to derive these estimates: Census 2012/ Population Projections 2012-2032
3. Periodicity
Calendar of the production of population estimates:
□ produced annually
after each census
at the midpoint of intercensal period
other, please specify:

3. Status of data

- 4.1 Type of estimation: intercensal, postcensal, other; please specify:
- **4.2** Data revision status: **provisional**, provisional revised, final, final revised, other; please specify:

4. Coverage

- **4.1** Please specify the time period covered by time series of the reported population estimates:
- **5.2** Please specify the territorial coverage of the time series of the reported population estimates:
 - **5.2.1** In case any areas of the country were not enumerated during the latest population census, are they considered in reported population estimates? Please describe as necessary:

5.3 Type of population count employed for the re	eported popi	ulation estin	nates:
present population (de-facto)			
□ usually resident population			
□ registered population			
other; please specify:			
5.4 Included or excluded population groups; please fill out the below tabulation:In order to clarify the exact composition of the population for which estimates were			
given in this questionnaire, please indicate below the	he dispositior	n of each grou	up listed.
Population group	Included	Excluded	Not applicable
(a) Nomads and persons living in areas to which access is difficult			
(b) Civilian residents temporarily absent from the country	⊠if for less than 6 months		
(c) Civilian foreigners who do not cross a border daily and are in the country temporarily	\boxtimes		
(d) Refugees, asylum seekers and internally displaced persons	\boxtimes		
(e) Military, naval and diplomatic personnel and their families located outside the country		\boxtimes	
(f) Foreign military, naval and diplomatic personnel and their families located in the country			
(g) Civilian foreigners who cross a border daily to work in the country	\boxtimes		
(h) Civilian residents who cross a border daily to work in another country	\boxtimes		
(i) Merchant seafarers and fishers resident in the country but at sea at the time of the latest census	\boxtimes		
(j) Homeless or roofless persons, and persons with no concept of usual residence	\boxtimes		
(k) Persons living in buildings with restricted access			

(I) Stateless persons			\boxtimes		
(m) Other; please specify			\boxtimes		
5. Primary data source (base data)					
6.1 Type of base data:					
(1) Continuous population register					
$oxed{\boxtimes}$ i) population actually enumerated	i) population actually enumerated				
☐ ii) population adjusted to take account of % underenumeration					
(3) Sample survey taken (date)					
(4) Partial census taken or partial registra	ation (d	date)			
Please describe method:					
(date)					
Please describe method:					
(6) Conjectural estimate derived by mear	s other than	counting			
Please describe method:					
6.2 Territorial coverage of base data, please specify:					
6.3 Type of population count employed in base	data:				
present population (de facto)					
usually resident population					
registered population					
other, please specify:					
7. Method of producing the reported population estimates					

7.1 Total population

Estimates of total population of a country may be constructed using several methods. Please indicate by a check mark the method used in constructing the reported population estimates.

7.1.1 Method of time adjustment

		explain: Census 2012 data and Population Projections 2012-
☐ (5)	No time	e adjustment (base figure held constant)
	Please	e provide the rate used, and describe how it was obtained:
	☐ (iii)	Other assumed rate
	☐ (ii) of migi	Assumption with respect to mortality, fertility, but no account taken ration
	☐ (i)	Assumption with respect to mortality, fertility, migration
☐ (4)	Applyin	g an assumed rate of increase, based on:
	☐ (ii)	Vital statistics adjusted for incompleteness
	☐ (i)	Registered vital statistics
) Applyi of migr	ng statistics of births and deaths (natural increase), but no account ration
	☐ (ii)	Vital statistics adjusted for incompleteness
	☐ (i)	Registered vital statistics
<u> </u>	Applyin	g statistics of births and deaths (natural increase), and migration
□ (1)	Populat	tion estimates are sourced annually from a population register

7.2 Population by age and sex

Estimates of population by age and sex are assumed to be constructed on the same base data as are the total population estimates. However, certain additional factors may affect age distributions estimated from census enumerations or from sample surveys. Please indicate below the adjustment(s) made in the basic age distribution used to construct the reported population estimates by age and sex.

7.2.1 Adjustments in base data

(1) No adjustments – the calculations are based on population actually enumerated at various ages or estimated from survey results.
(2) Enumerated population or population estimated from survey results adjusted to take account of under enumeration at various ages. Please describe as necessary the methods of adjustment.
(3) Base age distribution is "smoothed", i.e., adjusted to remove effects of digit preference in age reporting. Please describe as necessary the methods of smoothing.
7.2.2 Method of time adjustment
Please indicate below the method used in constructing the age-sex distribution of the reported population estimates by age and sex.
(1) Population estimates by age and sex are sourced annually from a population register
\square (2) Applying actual or assumed natural increase and migration
(3) Applying actual or assumed natural increase alone
(4) Distributing the total estimate according to percentage of population in each age-sex group at time of census of sample survey
$\hfill \square$ (5) Use of the cohort-components method to produce population estimates by age and sex
$\hfill \square$ (6) Innovative methods that use registers and administrative data. Please describe as necessary:
(7) By other means, please describe: Census 2012 data and Population Projections 2012-2032 were used
7.2.3 Disposition of unknown age
Please indicate below whether, in the preparation of the population estimates by age and sex:
$\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ $
$\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ $
(3) The frequency of unknown age appearing in the census or survey was zero.

Please indicate below the method used in making of urban, rural, and of city population.	ng intercensal or po	stcensal estimates
	Urban/rural population	City population
(1) Continuous population registers		
(2) Surveys, other than a census		
(3) Extrapolation of percentage		
(4) Observed rate of growth, assumed to continue		
(5) By other means; please describe: Census 2012 data and Population Projections 2012-2032 were used		

8. Bibliography of Demographic Statistics

Please list publications that contain results of your latest population census or survey, and current statistics on population estimates:

https://statistics-suriname.org/bevolkingsstatistieken-4/

(4) Other treatment for unknown age category.

7.3 Urban and rural population, and the population of cities
