

**United Nations Statistics Division: Demographic Yearbook
Questionnaire on Population Estimates
Part 2: Metadata**

Reporting country: [REPUBLIC OF MAURITIUS](#)
Reporting year: 2013

1. Coverage of data

In order to clarify the exact composition of the population for which estimates were given in this questionnaire, please indicate below the disposition of each group listed. Please also specify the years to which description refers to.

Population group	Estimated total population for the following years 2011		
	Included	Excluded	Not applicable
(a) Nomads	<input type="checkbox"/>	<input type="checkbox"/>	X
(b) Persons living in remote areas	X	<input type="checkbox"/>	<input type="checkbox"/>
(c) Military, naval and diplomatic personnel and their families located outside the country	X	<input type="checkbox"/>	<input type="checkbox"/>
(d) Merchant seamen and fishermen resident in the country but at sea at the time of the census (including those who have no place of residence other than their quarters aboard ship)	X	<input type="checkbox"/>	<input type="checkbox"/>
(e) Civilian residents temporarily in another country as seasonal workers	X	<input type="checkbox"/>	<input type="checkbox"/>
(f) Civilian residents who cross a frontier daily to work in another country	<input type="checkbox"/>	<input type="checkbox"/>	X
(g) Civilian residents other than those in (c), (e), and (f) working in another country	X	<input type="checkbox"/>	<input type="checkbox"/>
(h) Civilian residents other than those in (c)-(g), temporarily absent from the country	X	<input type="checkbox"/>	<input type="checkbox"/>
(i) Foreign military, naval and diplomatic personnel and their families located in the country	<input type="checkbox"/>	X	<input type="checkbox"/>
(j) Civilian aliens temporarily in the country as seasonal workers	<input type="checkbox"/>	<input type="checkbox"/>	X
(k) Civilian aliens who cross a frontier daily to work in another country	<input type="checkbox"/>	<input type="checkbox"/>	X
(l) Civilian aliens other than those in (i), (j), and (k) working in another country	<input type="checkbox"/>	<input type="checkbox"/>	X
(m) Civilian aliens other than those in (i)-(l), temporarily in country	<input type="checkbox"/>	X	<input type="checkbox"/>
(n) Transients on ships in harbour at the time of the census	<input type="checkbox"/>	X	<input type="checkbox"/>

2. Method of estimation

2.1 Total population

Estimates of total population for a country as a whole may be constructed by a variety of means. Please indicate by a check mark the method used in constructing the latest population estimate for 2011 (date) indicating the source of "base data" and the "method of time adjustment".

2.1.1 Base Data

- (1) Continuous population register
- (2) Complete census taken 2nd July 2000 (date)
 - i) population actually enumerated
 - ii) population adjusted to take account of 0.7 % underenumeration
- (3) Sample survey taken [] (date)
- (4) Partial census taken or partial registration [] (date)
(Please describe: [])
- (5) Non-censal count of [] (date)
(Please describe method: [])
- (6) Conjectural estimate derived by means other than counting
(Please describe method: [])

2.1.2 Method of time adjustment

- (1) Base data secured annually through population register
- (2) Applying statistics of births and deaths (natural increase), and migration
 - X (i) Registered vital statistics
 - (ii) Vital statistics adjusted for incompleteness
- (3) Applying statistics of births and deaths (natural increase), but no account taken of migration
 - (i) Registered vital statistics
 - (ii) Vital statistics adjusted for incompleteness

- (4) Extrapolating mathematically from censuses taken [redacted] (date 1), [redacted] (date 2) and [redacted] (date 3). Please give formula: [redacted]
- (5) Applying an assumed rate of increase, not derived by mathematical extrapolation or interpolation but based on: [redacted]
- (i) Assumption with respect to mortality, fertility, migration
 - (ii) Assumption with respect to mortality, fertility, but no account taken of migration
 - (iii) Other assumed rate
- Please give rate used, and describe how obtained: [redacted]
- (6) No time adjustment (base figure held constant)
- (7) Other (Please explain: [redacted])

2.2 Population by age and sex

Estimates of population according to age and sex are assumed to be constructed on the same base data as are the total estimates. However, certain additional factors may affect age distributions estimated from census enumerations or from sample surveys. Please indicate below the adjustment(s) made in the basic age distribution used to construct estimates shown in Tables 2 and 4.

2.2.1 Adjustments in base

- (1) None-based on population actually enumerated at various ages or estimated from survey results.
- X (2) Enumerated population or population estimated from survey results adjusted to take account of underenumeration at various age.
- (3) Base age distribution "smoothed", i.e., adjusted to remove effects of digit preference in age reporting.

2.2.2 Method of time adjustment

Distribution of estimated population according to age and sex may also be made by same methods as used to obtain the projection of the total figure, or it may be derived by distributing the estimate according to the percentage of population in each age-sex group at time of census.

Please indicate below the method used in constructing the age-sex distribution of the latest estimate shown in Table 2.

- X (1) Applying actual or assumed natural increase and migration
- (2) Applying actual or assumed natural increase alone

- (3) Distributing the total estimate according to percentage of population in each age-sex group at time of census or sample survey
- (4) By other means (Please describe:)

2.2.3 Disposition of unknown age

If frequency in unknown age category of tables 2 and 4 is zero, please indicate below whether, in the preparation of the estimates:

- (1) An age has been assigned to persons for whom age did not appear in the census or sample survey.
- X (2) Frequency in unknown age category has been distributed proportionately among known ages.
- (3) The frequency of unknown age appearing in the census or survey was zero.

2.3 Urban and rural population, and the population of cities

Please indicate below the method used in making post-censal estimates of urban and rural, and of city population.

	Urban/rural population	City population
(1) Continuous population registers	<input type="checkbox"/>	<input type="checkbox"/>
(2) Surveys, other than a census	<input type="checkbox"/>	<input type="checkbox"/>
(3) Extrapolation of percentage	<input type="checkbox"/>	<input type="checkbox"/>
(4) Observed rate of growth, assumed to continue	<input type="checkbox"/>	<input type="checkbox"/>
(5) By other means (Please describe: By applying statistics of births, deaths, international and internal migration. Birth and Death statistics are obtained from vital registration. Figures for international migration are estimated from past trends. Net internal migration however, is assumed to be the same as the annual net internal migration for the period 1995 – 2000. The latter being obtained from the 2000 Population Census.	<input type="checkbox"/>	<input type="checkbox"/>

3. Bibliography of Demographic Statistics

Please list publications that contain results of your latest population census or survey, and current statistics on population estimates:

- (i) The 2011 Housing and Population Census
Volume II: Demographic Characteristics

- (ii) Annual Digest of Statistics, 2011

- (iii) Digest of Demographic Statistics, 2011
