United Nations Statistics Division: Demographic Yearbook Questionnaire on Population Estimates Part 2: Metadata

Reporting country: Islamic Republic of Iran Reporting year: 2019

1. Coverage of data

In order to clarify the exact composition of the population for which estimates were given in this questionnaire, please indicate below the disposition of each group listed. Please also specify the years to which description refers to.

Population group	Estimated total population for the following years 2052			
· opaixion group	Included	Excluded	Not applicable	
(a) Nomads	\boxtimes			
(b) Persons living in remote areas	\boxtimes			
(c) Military, naval and diplomatic personnel and their families located outside the country			\boxtimes	
(d) Merchant seamen and fishermen resident in the country but at sea at the time of the census (including those who have no place of residence other than their quarters aboard ship)	Š			
(e) Civilian residents temporarily in another country as seasonal workers				
(f) Civilian residents who cross a frontier daily to work in another country	×			
(g) Civilian residents other than those in (c),(e), and (f) working in another country				
(h) Civilian residents other than those in (c)-(g), temporarily absent from the country				
(i) Foreign military, naval and diplomatic personnel and their families located in the country				
(j) Civilian aliens temporarily in the country as seasonal workers				
(k) Civilian aliens who cross a frontier daily to work in another country				
(I) Civilian aliens other than those in (i), (j), and (k) working in another country	Ž			
(m) Civilian aliens other than those in (i)-(l), temporarily in country				
(n) Transients on ships in harbour at the time of the census		\boxtimes		

* - Iranian censuses are implemented based on Dejour method. This method emphasizes on the conventional place of residence of individuals. According to the United Nations' recommendations, a person who lives with a household for six months or over, is considered as a member of the household. In the above table, for the cases with asterisk (*), the mentioned definition has been taken into account in the national population and housing censuses.

2. Method of estimation

2.1 Total population

2.1.1 Base Data

Estimates of total population for a country as a whole may be constructed by a variety of means. Please indicate by a check mark the method used in constructing the latest population estimate for 2016 (date) indicating the source of "base data" and the "method of time adjustment".

(1) Continuous population register
 \(\) Complete census taken 9 /1/2016(date) \(\) i) population actually enumerated \(\) ii) ×population adjusted to take account of % underenumeration
(3) Sample survey taken (date)
(4) Partial census taken or partial registration (date)
(Please describe:)
(5) Non-censual count of (date)
(Please describe method:)
(6) Conjectural estimate derived by means other than counting
(Please describe method :)
2.1.2 Method of time adjustment
(1) Base data secured annually through population register
$oxed{\boxtimes}$ (2) Applying statistics of births and deaths (natural increase), and migration

	Registered vital statistics Vital statistics adjusted for i	ncompleteness			
	ving statistics of births and degration	eaths (natural increase)	, but no account	taken	
	Registered vital statistics Vital statistics adjusted for	incompleteness			
(4) Extra 2) ar	polating mathematically fron d (date 3). Please giv		(date 1),	(date	
	ving an assumed rate of incretion but based on:	ease, not derived by ma	thematical extra	polation	
☐ (i	 (i) Assumption with respect to mortality, fertility, migration (ii) Assumption with respect to mortality, fertility, but no account taken of migration (iii) Other assumed rate 				
`	se provide the rate used, and	I describe how it was ob	tained:		
☐ (6) No ti	me adjustment (base figure l	neld constant)			
☐ (7) Othe	r (Please explain:)				
2.2 Popula	tion by age and sex				
the same baffect age Please ind	of population according to a ase data as are the total est distributions estimated from cate below the adjustment stimates shown in Tables 2 a	imates. However, certain census enumerations of made in the basic and th	in additional fact or from sample	ors may surveys.	
2.2.1 Adjus	tments in base				
	djustments – the calculations rious ages or estimated from		on actually enum	erated	
	nerated population or popula account of under enumeration		vey results adjus	sted to	
` '	age distribution is "smoothe rence in age reporting.	d", i.e., adjusted to rem	ove effects of dig	git	
2.2.2 Meth	od of time adjustment				

Distribution of estimated population according to age and sex may also be made by same methods as used to obtain the projection of the total figure, or it may be derived

y distributing the estimate according to the percentage of population in each age-sex roup at time of census.						
Please indicate below the method used in constructing the age-sex distribution of the atest estimate shown in Table 2.						
 ∑ (1) Applying actual or assumed natural increase and migration ☐ (2) Applying actual or assumed natural increase alone ☐ (3) Distributing the total estimate according to percentage of population in each agesex group at time of census of sample survey ☐ (4) By other means (Please describe:) 						
2.2.3 Disposition of unknown age						
If frequency in unknown age category of tables 2 and 4 is zero, please indicate below whether, in the preparation of the estimates:						
(1) An age has been assigned to persons for whom age did not appear in the census or sample survey.						
(2) Frequency in unknown age category has been distributed proportionately among known ages.						
igtimes (3) The frequency of unknown age appearing in the census or survey was zero.						
2.3 Urban and rural population, and the population of cities						
Please indicate below the method used in making post-censal estimates of urban and rural, and of city population.						
	Urban/rural population	City population				
(1) Continuous population registers						
(2) Surveys, other than a census						
(3) Extrapolation of percentage						
(4) Observed rate of growth, assumed to continue						
(5) By other means (Please describe:)						

3. Bibliography of Demographic Statistics

Please list publications that contain results of your latest population census or survey, and current statistics on population estimates:

Note – The results of the 2016 National Population and Housing Census of the Islamic Republic of Iran are available on the website of the Statistical Centre of Iran: www.amar.org.ir/english/Population-and-Housing-Censuses)
