Base denominator for this estimate is:	
(a) Enumerated population	<input checked="" type="checkbox"/>
(b) Estimated "complete" population	<input type="checkbox"/>
(c) Don't know	<input type="checkbox"/>

Method(s) used in estimating completeness:	N/A
(a) Post Enumeration Survey (PES)	<input type="checkbox"/>
Date conducted: <input type="text"/>	
Size of sample (specify unit: <input type="text"/> ):	
For total area: <input type="text"/>	

For urban areas: [REDACTED]	
For rural areas: [REDACTED]	
Population groups excluded: [REDACTED]	
(b) Demographic analysis, please specify: [REDACTED]	<input type="checkbox"/>
(c) Other methods, please specify: n/a 100% coverage	<input type="checkbox"/>

#### 4. Definition of urban/rural

The definition of urban areas for this census is:

##### [REDACTED] Aggregate Town and Aggregate Rural Areas

In continuation of the definition used in reports of censuses since 1966, the population in the Aggregate Town Area, is defined as those persons living in population clusters of 1,500 or more inhabitants. If a town with a legally defined boundary has a suburban area or environs outside this boundary and if the total population made up of the population inside the legally defined boundary plus that in the suburbs or environs amounts to 1,500 persons or over, this town (including its suburbs or environs) is classified as belonging to the Aggregate Town Area. Similarly, a census town with 1,500 inhabitants or over is classified as belonging to the Aggregate Town Area.

The population residing outside Aggregate Town Areas is classified as belonging to the Aggregate Rural Area. The Aggregate Rural Area is a statistical concept, the rural area is a former administrative unit of area.

The definition of rural areas for this census is:

[REDACTED] Any town village or area with low population density below 200 persons or 50 households

#### 5. Definition of cities

The definition of a city proper for this census is:

[REDACTED] Under the Local Government Act, 2001 (S.I. 591 of 2001), the areas formerly known as County Boroughs are now called Cities.

The definition of urban agglomeration for this census is:

[REDACTED] Not applicable

## 6. Definition of locality

The definition of a locality for this census is:

For Census purposes, a locality is defined as a distinct population cluster, that is, the population living in neighbouring buildings which either: (a) form a continuous built-up area, with a clearly recognizable street formation; or (b) though not part of such a built up area form a group which a locally recognized place name is uniquely attached; or (c) though not coming within either of the above two requirements constitute a group none of which is separated from its nearest neighbour by more than 200 metres.

Do you follow the International Standard Classification for International Standard Industrial Classification of All Economic Activities (ISIC) for tabulating the employed population by industry?

---

<sup>1</sup> Standard Occupational Classification, Second edition, HMSO, London, 1995.

**As in the 2002 Census, the 2006 Census continues to code industry using NACE – the General Industrial Classification of Economic Activities within the European Communities**

If so, what revision?

If any other classification is used, are you able to provide data in ISIC (specify revision number).

Yes, NACE coded back to ISIC

If no, please point out the major deviations from ISIC (specify revision number)..

## **C. Household characteristics**

### **1. Definitions**

General definition of a household for this census is:

A *private household* comprises either one person living alone or a group of people (not necessarily related) living at the same address with common housekeeping arrangements - that is, sharing at least one meal a day or sharing a living room or sitting room.

A *permanent private household* is a private household occupying a permanent dwelling such as a dwelling house, flat or bedsitter (see question H1 on the second page of the census form).

A *temporary private household* is a private household occupying a caravan, mobile home or other temporary dwelling and includes travelling people and homeless persons living rough on census night.

General definition of a family nucleus for this census is:

### **Family Units**

A family unit *or nucleus* is defined as:

- (1) a husband and wife or a cohabiting couple; or
- (2) a husband and wife or a cohabiting couple together with one or more usually resident never-married children (of any age); or
- (3) one parent together with one or more usually resident never-married children (of any age).

Family members have to be usual residents of the relevant household.

The determination of household and family composition is based on responses to the question on the census form dealing with relationships within the household. In the 2002 and previous censuses the question referred to the relationship of all persons in the household to the reference person in the household.

**2. Head of household / reference member**

Definition	
(a) Head of household, defined as follows:	<input type="checkbox"/>
(b) Reference member of household, defined as follows: 1st member of household to fill form	<input checked="" type="checkbox"/>
(c) Other (for example: Joint head of household):	<input type="checkbox"/>

The term "Reference Person" is used in place of "Head of Household", which was used in the 1996 and previous censuses. The reference person in each private household is the first usual resident in the household. This is the person with the lowest Person Number. Where there were no usual residents present in the household on census night, the first absent person was used as the reference person.

## D. Housing census characteristics

### 1. Housing information

What definition did you apply in this census for housing unit?

A *housing unit* is a conventional house, a structurally separate flat or apartment or a mobile or temporary dwelling, regardless of the number of private households it contains; when temporary dwellings are excluded the definition relates to a *permanent housing unit*. The 2002 Census collected details on the number of households/dwellings, but not on the number of housing units. This is a departure from the practice used in the 1991 and previous relevant censuses.

What definition did you apply in this census for conventional dwelling?

House, flat or bedsitter.

Are vacant units included in the enumerated conventional dwellings?

What definition did you apply in this census for room?

For number of rooms in a household we asked for kitchenettes, bathrooms, toilets, utility rooms, consulting rooms, offices, shops, halls or landings or rooms that can only be used for storage such as cupboards not to be included.
