

**Quality of vital statistics obtained from civil registration**

| <b>I. Basis of tabulation</b>                           | Live births | Deaths | Infant deaths | Late foetal deaths | Marriages | Divorces |
|---|-------------|--------|---------------|--------------------|-----------|----------|
| Present basis of tabulation:                            |             |        |               |                    |           |          |
| - date of occurrence                                    | x           | x      | x             | x                  | x         | x        |
| - date of registration                                  |             |        |               |                    |           |          |
| How long has the present basis of tabulation been used? |             |        |               |                    |           |          |

| <b>II. Estimated completeness of registration</b> | Live births | Deaths | Infant deaths | Late foetal deaths | Marriages | Divorces |
|---|-------------|--------|---------------|--------------------|-----------|----------|
| 90 per cent or more                               | x           | x      | x             | x                  | x         | x        |
| 75-89 per cent                                    |             |        |               |                    |           |          |
| 50-74 per cent                                    |             |        |               |                    |           |          |
| Under 50 per cent                                 |             |        |               |                    |           |          |
| Please specify:                                   |             |        |               |                    |           |          |
| (a) Year(s) to which completeness estimate refers | 2012        | 2012   | 2012          | 2012               | 2012      | 2012     |
| (b) Basis of completeness estimate                |             |        |               |                    |           |          |
| -Demographic analysis                             |             |        |               |                    |           |          |
| -Dual record check                                |             |        |               |                    |           |          |
| -Questions in population census                   |             |        |               |                    |           |          |
| -Questions in sample surveys                      |             |        |               |                    |           |          |
| -Other (specify)                                  |             |        |               |                    |           |          |
| -No evaluation                                    |             |        |               |                    |           |          |

Please include any reports describing completeness of registration and methods used in arriving at estimated completeness:

|   |
|---|
| Completeness is controlled by checking the continuity of civil unit acts' numeration. |
|---|

**Quality of vital statistics obtained from other sources**

| <b>Basis of vital statistics estimates is</b> |  |  |  |  |  |  |
|---|--|--|--|--|--|--|
| - Population censuses (date)                  |  |  |  |  |  |  |

|                        |  |  |  |  |  |  |
|------------------------|--|--|--|--|--|--|
| - Sample surveys       |  |  |  |  |  |  |
| - Population registers |  |  |  |  |  |  |
| - Dual record systems  |  |  |  |  |  |  |
| - Other (specify)      |  |  |  |  |  |  |

Please include any reports describing the methods used for estimates of vital statistics based on other sources than civil registration:

**Additional metadata for selected tables**

**Table 1.1 - Urban / rural definitions**

|  |  |
|--|--|
| Please state the definition used for urban area and the period of time it has been in use: | areas having official municipal rights     |
| Please state the definition used for rural area and the period of time it has been in use: | areas not having official municipal rights |

**Table 1.6 - Grounds for legally induced abortion**

|  |   |                    |
|--|---|--------------------|
| <i>Please mark with an "X" the applicable options</i>  | X |                    |
| a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.                            | x |                    |
| b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated.           | x |                    |
| c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated.             |   |                    |
| d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated. |   |                    |
| e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.      | x |                    |
| f) Other, please specify.  | x | A result of crime. |

**Tables 14a, 14b, 15a and 15b - Life tables**

|  |   |
|--|---|
| Do the life tables refer to de Facto population or de Jure population? | De jure   |
| Was any method used to smoothen the life table? Which one?             | Moving parabolic fit with different numbers of terms is employed as a method of smoothing of the probabilities of death |

|   |   |  |
|---|---|--|
| Was any specific method used to close the life table at older ages (e.g., Gompertz, Makeham, etc.)? Which one?  | To calculate $q_x$ for ages 85 and more polynomial-exponential function is fitted to the number of survivors in points 40, 45, ... , 85 and next it is extrapolated for ages 85-120 |  |
| If any model life table or relational model was used to derive the life table (e.g., Coale-Demeny West, UN South Asian pattern), what model was used? | No model is used  |  |
|   |   |  |
| <i>Please mark with an "X" the applicable options</i>   | X   |  |
| What source of data was used to compute the life tables?  |   |  |
| a) Unadjusted vital registration deaths   |   |  |
| b) Adjusted vital registration deaths   | x   |  |
| c) Deaths census information  |   |  |
| d) Life expectancy at birth   |   |  |
| e) Under-five mortality   |   |  |
| f) Infant mortality   |   |  |

**Table 22 Minimum legal marriage age**

| Please specify the minimum legal age at which marriage can take place: | Men | Women |
|--|-----|-------|
| a) With parental consent   |     |       |
| b) Without parental consent  |     |       |
