

**Quality of vital statistics obtained from civil registration**

| <b>I. Basis of tabulation</b>                           | Live births | Deaths | Infant deaths | Late foetal deaths | Marriages | Divorces |
|---|-------------|--------|---------------|--------------------|-----------|----------|
| Present basis of tabulation:                            |             |        |               |                    |           |          |
| - date of occurrence                                    | X           | X      | X             | X                  | X         | X        |
| - date of registration                                  |             |        |               |                    |           |          |
| How long has the present basis of tabulation been used? | 1994        | 1994   | 1994          | 1994               | 1994      | 1994     |

| <b>II. Estimated completeness of registration</b> | Live births | Deaths | Infant deaths | Late foetal deaths | Marriages | Divorces |
|---|-------------|--------|---------------|--------------------|-----------|----------|
| 90 per cent or more                               | X           | X      | X             | X                  | X         | X        |
| 75-89 per cent                                    |             |        |               |                    |           |          |
| 50-74 per cent                                    |             |        |               |                    |           |          |
| Under 50 per cent                                 |             |        |               |                    |           |          |
| Please specify:                                   |             |        |               |                    |           |          |
| (a) Year(s) to which completeness estimate refers |             |        |               |                    |           |          |
| (b) Basis of completeness estimate                |             |        |               |                    |           |          |
| -Demographic analysis                             |             |        |               |                    |           |          |
| -Dual record check                                |             |        |               |                    |           |          |
| -Questions in population census                   |             |        |               |                    |           |          |
| -Questions in sample surveys                      |             |        |               |                    |           |          |
| -Other (specify)                                  | X           | X      | X             | X                  | X         | X        |
| -No evaluation                                    |             |        |               |                    |           |          |

Please include any reports describing completeness of registration and methods used in arriving at estimated completeness:

The completeness of registration is assured by cross-checking the statistical bulletins used to record demographic events with the registrations of vital events in civil status registers

**Quality of vital statistics obtained from other sources**

| <b>Basis of vital statistics estimates is</b> |  |  |  |  |  |   |
|---|--|--|--|--|--|---|
| - Population censuses (date)                  |  |  |  |  |  |   |
| - Sample surveys                              |  |  |  |  |  |   |
| - Population registers                        |  |  |  |  |  | X |
| - Dual record systems                         |  |  |  |  |  |   |
| - Other (specify)                             |  |  |  |  |  |   |

Please include any reports describing the methods used for estimates of vital statistics based on other sources than civil registration:

**Additional metadata for selected tables**

**Table 1.1 - Urban / rural definitions**

|  |  |
|--|--|
| Please state the definition used for urban area and the period of time it has been in use: |  |
| Please state the definition used for rural area and the period of time it has been in use: |  |

**Table 1.6 - Grounds for legally induced abortion**

|  |   |              |
|--|---|--------------|
| <i>Please mark with an "X" the applicable options</i>  | X |              |
| a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.                            | X |              |
| b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated.           | X |              |
| c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated.             | X |              |
| d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated. | X |              |
| e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.      | X |              |
| f) Other, please specify.  | X | Upon request |

**Tables 14a, 14b, 15a and 15b - Life tables**

|  |  |
|--|--|
| Do the life tables refer to de Facto population or de Jure population?   | Romania's NSI uses the permanent residence population.                       |
| Was any method used to smoothen the life table? Which one?   | The life table was smoothened by averaging the data values over three years. |
| Was any specific method used to close the life table at older ages (e.g., Gompertz, Makeham, etc.)? Which one? | No specific method was used to close the life tables at older ages.          |

|   |                          |  |
|---|--------------------------|--|
| If any model life table or relational model was used to derive the life table (e.g., Coale-Demeny West, UN South Asian pattern), what model was used? | No such method was used. |  |
| <i>Please mark with an "X" the applicable options</i>   | X                        |  |
| What source of data was used to compute the life tables?  |                          |  |
| a) Unadjusted vital registration deaths   | X                        |  |
| b) Adjusted vital registration deaths   |                          |  |
| c) Deaths census information  |                          |  |
| d) Life expectancy at birth   |                          |  |
| e) Under-five mortality   |                          |  |
| f) Infant mortality   |                          |  |
