#### Serbia

Reporting Year: 2015

### Quality of vital statistics obtained from civil registration

| I. Basis of tabulation                                  | Live births | Deaths | Infant deaths | Late foetal deaths | Marriages | Divorces |
|---|-------------|--------|---------------|--------------------|-----------|----------|
| Present basis of tabulation:                            |             |        |               |                    |           |          |
| - date of occurrence                                    |             |        |               |                    |           |          |
| - date of registration                                  |             |        |               |                    |           |          |
| How long has the present basis of tabulation been used? |             |        |               |                    |           |          |

| II. Estimated completeness of registration        | Live births | Deaths | Infant deaths | Late foetal deaths | Marriages | Divorces |
|---|-------------|--------|---------------|--------------------|-----------|----------|
| 90 per cent or more                               |             |        |               |                    |           |          |
| 75-89 per cent                                    |             |        |               |                    |           |          |
| 50-74 per cent                                    |             |        |               |                    |           |          |
| Under 50 per cent                                 |             |        |               |                    |           |          |
| Please specify:                                   |             |        |               |                    |           |          |
| (a) Year(s) to which completeness estimate refers |             |        |               |                    |           |          |
| (b) Basis of completeness estimate                |             |        |               |                    |           |          |
| -Demographic analysis                             |             |        |               |                    |           |          |
| -Dual record check                                |             |        |               |                    |           |          |
| -Questions in population census                   |             |        |               |                    |           |          |
| -Questions in sample surveys                      |             |        |               |                    |           |          |
| -Other (specify)                                  |             |        |               |                    |           |          |
| -No evaluation                                    |             |        |               |                    |           |          |

Please include any reports describing completeness of registration and methods used in arriving at estimated completeness:

### Additional metadata for selected tables

### Table 1.1 - Urban / rural definitions

| Discount the definition would for when are and the maried of      | There is no legal act with defined criteria for type of settlements that would be valid for the whole territory of the Republic of Serbia. But, from the Census 1981, there were applicable legal criteria by which the settlements were categorized as "urban" and "other". Urban settlements are considered those settlements which are declared based on rules or decisions by local government units. Urban area is the sum of urban settlements. |
|---|---|
| unie it nas been in use.  | settlements.  |
| Please state the definition used for rural area and the period of |   |
| time it has been in use:  | The rural area is the sum of the settlements categorized as "other."  |

Table 1.6 - Grounds for legally induced abortion

| Please mark with an "X" the applicable options   | Х |  |
|--|---|--|
| a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.                            |   |  |
| b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated.           |   |  |
| c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated.             |   |  |
| d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated. |   |  |
| e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.      |   |  |
| f) Other, please specify.  |   |  |

## **Tables 14a, 14b, 15a and 15b - Life tables**

| Do the life tables refer to de Facto population or de Jure | Complete life tables refer to census data, while abridged life tables refer to results on |  |
|--|---|--|
| population?  | population estimates for current year.  |  |

| Was any method used to smoothen the life table? Which one?  | Methods used for smoothing in constructing the complete life tables are Karup method and Gompertz-Makenham method. |  |  |  |  |
|---|--|--|--|--|--|
| Was any specific method used to close the life table at older ages (e.g., Gompertz, Makeham, etc.)? Which one?  | Gompertz-Makenham method was used at age of 81 years and more  |  |  |  |  |
| If any model life table or relational model was used to derive the life table (e.g., Coale-Demeny West, UN South Asian pattern), what model was used? |  |  |  |  |  |
| Please mark with an "X" the applicable options  | X  |  |  |  |  |
| What source of data was used to compute the life tables?  |  |  |  |  |  |
| a) Unadjusted vital registration deaths   |  |  |  |  |  |
| b) Adjusted vital registration deaths   |  |  |  |  |  |
| c) Deaths census information  |  |  |  |  |  |
| d) Life expectancy at birth   |  |  |  |  |  |
| e) Under-five mortality   |  |  |  |  |  |
| f) Infant mortality   |  |  |  |  |  |

# Table 22 Minumum legal marriage age

| Please specify the minimum legal age at which marriage can |     |       |
|--|-----|-------|
| take place:  | Men | Women |
| a) With parental consent                                   | 16  | 16    |
| b) Without parental consent                                | 18  | 18    |

By the Family Law of the Republic of Serbia: marriage cannot be contructed by a person below the age of 18; only the court may, for good cause, permit marriage to a minor who has attained the age of 16 years of age, and attained physical and mental maturity to exercise the rights and responsibilities of marriage. Parental consent is not required.
