### Slovakia

Reporting Year: 2013

## Quality of vital statistics obtained from civil registration

I. Basis of tabulation	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
Present basis of tabulation:						
- date of occurrence	x	х	х	x	Х	х
- date of registration						
How long has the present basis of tabulation been used?	1993	1993	1993	1993	1993	1993

II. Estimated completeness of registration	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
90 per cent or more						
75-89 per cent						
50-74 per cent						
Under 50 per cent						
Please specify:						
(a) Year(s) to which completeness estimate refers						
(b) Basis of completeness estimate						
-Demographic analysis						
-Dual record check						
-Questions in population census						
-Questions in sample surveys						
-Other (specify)	see	file	"Note V	Γ statistics basis.doc"		
-No evaluation						

Please include any reports describing completeness of registration and methods used in arriving at estimated completeness:

## Quality of vital statistics obtained from other sources

Basis of vital statistics estimates is			
- Population censuses (date)			

- Sample surveys						
- Population registers						
- Dual record systems						
- Other (specify)						
Please include any reports describing the methods used for estim	ates of vital st	atistics base	ed on other sour	ces than civil regist	ration:	

## Slovakia

### Additional metadata for selected tables

### Table 1.1 - Urban / rural definitions

	Urban area - municipality with the status of city assigned by the Ministry of Interior (there are 138 urban municipalies in the Slovak Republic).
Please state the definition used for rural area and the period of	
time it has been in use:	Rural area - the rest of municipalities (without the status of city)

## Table 1.6 - Grounds for legally induced abortion

rabio 1.0 Croanac for logary madoca abortion		
Please mark with an "X" the applicable options	Х	
a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.	х	
b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated.	х	
c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated.	x	
d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated.	х	
e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.	x	
f) Other, please specify.		

## Tables 14a, 14b, 15a and 15b - Life tables

Do the life tables refer to de Facto population or de Jure	
population?	de Jure population
Was any method used to smoothen the life table? Which one?	no
Was any specific method used to close the life table at older	
ages (e.g., Gompertz, Makeham, etc.)? Which one?	Compertz – Makeham formula

If any model life table or relational model was used to derive the						
life table (e.g., Coale-Demeny West, UN South Asian pattern), what model was used?	no					
what model was asea:	no					
Please mark with an "X" the applicable options	Х					
What source of data was used to compute the life tables?						
a) Unadjusted vital registration deaths	х					
b) Adjusted vital registration deaths						
c) Deaths census information						
d) Life expectancy at birth						
e) Under-five mortality						
f) Infant mortality						
f) Infant mortality						
f) Infant mortality						
f) Infant mortality						
f) Infant mortality						
f) Infant mortality
