Australia

Reporting Year: 2013

Quality of vital statistics obtained from civil registration

. Basis of tabulation	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
Present basis of tabulation:						
- date of occurrence						:
- date of registration	х	х	х	х	х	
How long has the present basis of tabulation been used?	at least 5 years	least 5 years	at least 5 years	at least 5 years	at least 5 years	l least 5 year
. Estimated completeness of registration	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
90 per cent or more	х	х	х	not available (ABS)	х	;
75-89 per cent						
50-74 per cent						
Under 50 per cent						
Please specify:						
(a) Year(s) to which completeness estimate refers						
(b) Basis of completeness estimate						
-Demographic analysis						
-Dual record check						
-Questions in population census						
-Questions in sample surveys						
-Other (specify)						
-No evaluation						
Please include any reports describing completeness of registration	and methods used	in arriving at	estimated compl	eteness:		

Quality of vital statistics obtained from other sources

Basis of vital statistics estimates is			
- Population censuses (date)			
- Sample surveys			

- Population registers						
- Dual record systems						
- Other (specify)	Registration	Registration	Registration	Registration	Registration	Registration
Please include any reports describing the methods used for estimates of vital statistics based on other sources than civil registration:						

Please include any reports describing the methods used for estimates of vital statistics based on other sources than civil registration:
Registration of vital statistics is the responsibility of state and territory Registrars of Births, Deaths and Marriages.

Additional metadata for selected tables

Please state the definition used for urban area and the period of time		
it has been in use:	Significant Urban Areas (SUAs) are a geographical unit that describe extended urban concentration	ons of more than 10,000 people. They are based on The Australian Statistical Geography Standard (ASGS) (cat. no. 1270.0)
Please state the definition used for rural area and the period of time		
it has been in use:	Rural are the remainder of areas not included in the urban category.	

Table 1.6 - Grounds for legally induced abortion

Table 110 Clounds for legally madeca abortion		
Please mark with an "X" the applicable options	Х	
a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.		
b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated.		
c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated.		
d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated.		
e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.		
f) Other, please specify.		

Tables 14a, 14b, 15a and 15b - Life tables

Do the life tables refer to de Facto population or de Jure population?	de Jure	
Was any method used to smoothen the life table? Which one?	A variety of methods are used to smooth life tables for different age ranges. 1. Whittaker-Henderson graduation (ages 2-40); 2. Cubic Splines (ages 22-96); 3. Makeham function (ages 2-40); 2. Cubic Splines (ages 22-96); 3. Makeham function (ages 2-40); 3. Makeham function (ages 2-40); 4. Cubic Splines (ages 22-96); 3. Makeham function (ages 2-40); 4. Cubic Splines (ages 22-96); 4. Cubic Splines (ages 22-96); 5. Cubic Splines (ages 22-96); 6. Cubic Splines (ages 22-96); 7. Cubic Splines (ages 22-96); 7. Cubic Splines (ages 22-96); 8. Cubic Splines (ages 22-96); 8. Cubic Splines (ages 22-96); 8. Cubic Splines (ages 22-96); 9. Cubic Splines (ages	85-120)
Was any specific method used to close the life table at older ages		
(e.g., Gompertz, Makeham, etc.)? Which one?	Makeham function	
If any model life table or relational model was used to derive the life		
table (e.g., Coale-Demeny West, UN South Asian pattern), what		
model was used?	NA .	
Please mark with an "X" the applicable options	X	
What source of data was used to compute the life tables?		
a) Unadjusted vital registration deaths	x	
b) Adjusted vital registration deaths		
c) Information on deaths from census		
d) Life expectancy at birth		
e) Under-five mortality		
f) Infant mortality	x	

Table 22 Minumum legal marriage age

rabio == minamani rogar marriago ago		
Please specify the minimum legal age at which marriage can take		
place:	Men	Women
a) With parental consent	16	16
b) Without parental consent	18	18
