

**Quality of vital statistics obtained from civil registration**

<b>I. Basis of tabulation</b>	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
Present basis of tabulation:						
- date of occurrence	Yes	Yes	Yes			
- date of registration	Yes	Yes	Yes		Registration	Registration
How long has the present basis of tabulation been used?	At least 10 years	At least 10 years	At least 10 years		At least 10 years	At least 10 years

<b>II. Estimated completeness of registration</b>	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
100 per cent	Yes	Yes	Yes	not always occur in the same year.		of divorce
90 - 99 per cent						
80 - 89 per cent						
70 - 79 per cent						
60 - 69 per cent						
50 - 59 per cent						
Under 50 per cent						
Please specify:						
(a) Year(s) to which completeness estimate refers	2007-2017					
(b) Basis of completeness estimate						
-Demographic analysis	Yes	Yes	Yes		Yes	Yes
-Dual record check	Yes					
-Questions in population census	Yes					
-Questions in sample surveys						
-Other (specify)						
-No evaluation						

Please include any reports describing completeness of registration and methods used in arriving at estimated completeness:

**Quality of vital statistics obtained from other sources**

<b>Basis of vital statistics estimates is</b>						
- Population censuses (date)						
- Sample surveys						
- Population registers	State and Territory	State and Territory	State and Territory	State and Territory	State and Territory	State and Territory (FCA).
- Dual record systems						
- Other (specify)	Registration	Registration	Registration		Registration	Registration (FCA)

Please include any reports describing the methods used for estimates of vital statistics based on other sources than civil registration:

**Additional metadata for selected tables**

**Table 1.1 - Urban / rural definitions**

Please state the definition used for urban area and the period of time it has been in use:	Description in table footnotes
Please state the definition used for rural area and the period of time it has been in use:	Description in table footnotes

**Table 1.6 - Grounds for legally induced abortion**

<i>Please mark with an "X" the applicable options</i>	X	
a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.		
b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated.		
c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated.		
d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated.		
e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.		
f) Other, please specify.	N/A	

**Tables 14a, 14b, 15a and 15b - Life tables**

Do the life tables refer to de Facto population or de Jure population?	de Jure population	
Was any method used to smoothen the life table? Which one?	A variety of methods are used to smooth life tables for different age ranges. 1. Whittaker-Henderson graduation (ages 2-40); 2. Cubic Splines (ages 22-96); 3. Makeham function (ages 85-120).	
Was any specific method used to close the life table at older ages (e.g., Gompertz, Makeham, etc.)? Which one?		
If any model life table or relational model was used to derive the life table (e.g., Coale-Demeny West, UN South Asian pattern), what model was used?		
<i>Please mark with an "X" the applicable options</i>	X	
What source of data was used to compute the life tables?		
a) Unadjusted vital registration deaths		
b) Adjusted vital registration deaths	X	
c) Information on deaths from census		
d) Life expectancy at birth		
e) Under-five mortality		
f) Infant mortality
