The MDG Country Progress Snapshot provides an overview of the progress achieved at country level since 1990 towards the Millennium Development Goals. The snapshot is intended mainly to provide the international community easy access to the information and are not meant to replace in any way the country profiles produced at the national level in several countries. They are also meant to reflect the contribution of country-level progress to the global and regional trends on progress towards the MDGs.

The data used in the snapshot are from the MDG global database (<http://mdgs.un.org/unsd/mdg/Data.aspx>). The metadata and responsible agencies can be found on <http://mdgs.un.org/unsd/mdg/Metadata.aspx>. Sources of discrepancies between global and national figures are due to, among others, different methodology and definitions or different choice of data sources. At the global level, the monitoring of the progress aims to ensure better comparability of data among countries. Country can contact the responsible agencies for resolving data discrepancies.

Note: 1) The country progress level indicates the present degree of compliance with the target based on the latest available data. The technical note on the progress level can be found at <http://mdgs.un.org/unsd/mdg/Resources/Static/Products/Progress2012/technicalnote.pdf>.
