

**Updating of the SNA-93,
issue 26: CULTIVATED ASSETS**

Proposal to the Advisory Expert Group (AEG) of 02/2004:

More precise definition: Cultivated assets cover , **whose natural growth and regeneration** is under the direct control, responsibility and management of institutional units.

German opinion:

We have no general objection against a more precise definition of cultivated assets. However, we suggest to drop the word "natural" in this context and to replace "that are" by the wording "..., whose growth and regeneration is under the direct control,....".
