

DZ.5 Increasing the visibility of digitalisation in economic statistics through compilation of Digital Supply-Use Tables

Instructions

For each question, please provide the answer by clicking the relevant check box or by typing in the framed textboxes, which will expand to fit the text. **We recommend providing coordinated answers between the national agencies responsible for the national accounts and balance of payments compilation.**

Please note that the survey may reach one or more contacts in your agency; however, only one response is expected. A printable version of the questionnaire is available for your convenience. If you have any questions, please contact nicola.massarelli@ec.europa.eu and sna@un.org.

We look forward to and highly appreciate your collaboration.

Sincerely,
Digitalization Task Team

1. Please provide your information below:

Country _____

Institution/Organization _____

Name _____

Position/Title _____

Email _____

(End of Page 1)

Conceptual issues/recommendations

2. On a conceptual level, do you support the digital SUTs framework as a way to increase the visibility of digitalization in the national accounts?

- Yes
- No
- Undecided

3. Please provide arguments in favor of your response:

(End of Page 2)

Practical implementation

4. Is the construction of digital SUTs relevant for your country?

- Very relevant
- Somewhat relevant
- Not relevant

5. In the next 3-5 years, do you intend to compile, or have you already compiled, experimental statistics, partially or fully consistent with the digital SUTs framework in your country?

- Yes
- No

This Question is Conditionally Shown if: (5 = Yes)

5.1. What are you planning to compile?

- The full table
- All high priority indicators outlined in the guidance note
- Some of the high priority indicators outlined in the guidance note
- Other, please specify: _____

This Question is Conditionally Shown if: (5 = Yes)

5.2. For indicators you are planning to introduce, what is the timeliness, and the time series length of the data?

This Question is Conditionally Shown if: (5 = Yes)

5.3. What difficulties have you faced in attempting to compile outputs consistent with the guidance note?

This Question is Conditionally Shown if: (5 = Yes)

5.4. When will experimental estimates be available?

This Question is Conditionally Shown if: (5 = No)

5.5. What are the reasons your country does not intend to produce experimental statistics related to the digital SUTs? Select all that apply.

- Because there is a lack of demand from users.
- Because the use of digital technology is not widespread in your economy.
- Because there is a lack of statistical resources to compile these outputs.
- Other reasons.

This Question is Conditionally Shown if: (5.5 (Because there is a lack of demand from users.) = Selected)

5.5.1. Because there is a lack of demand from users - please detail feedback received from users.

This Question is Conditionally Shown if: (5.5 (Because there is a lack of statistical resources to compile these outputs.) = Selected)

5.5.3. Because there is a lack of statistical resources to compile these outputs - please detail what challenges are currently faced by the NSO (i.e. a lack of source data, a lack of technical expertise, an absence of established SUT framework, additional workload).

This Question is Conditionally Shown if: (5.5 (Other reasons.) = Selected)

5.5.4. Other reasons - please detail.

6. Would your institution be interested in participating in an experimental estimate exercise?

- Yes
- No

This Question is Conditionally Shown if: (6 = Yes)

6.1. If yes, what technical assistance, if any, would you need?

7. Does your country currently undertake any alternative approach to increasing the visibility of digitalisation in the national accounts?

- Yes
- No

8. Please share any other comment or information you may have that is relevant to the discussion.
