Instructions

For each question, please provide the answer by clicking the relevant check box or by typing in the framed textboxes, which will automatically expand to fit the text. We recommend providing coordinated answers between the national agencies responsible for the national accounts and balance of payments compilation (for example, National Statistics Office and Central Bank). If only one agency is providing a coordinated answer concerning national accounts and balance of payments, please indicate that in your response to the questionnaire concerning which area of macroeconomic statistics. Otherwise, please choose the area of macroeconomic statistics your answer is referring to.

Please note that the survey may reach one or more contacts in your agency; however, only one response is expected. A printable version of the questionnaire and the guidance note are available at the SNA Consultations webpage of the United Nations Statistics Division, and the Globalization Task Team webpage on the IMF's *BPM6* website. If you have any questions, please contact: SNA-Globalization@imf.org and copy sna@un.org. We look forward to and highly appreciate your collaboration.

Sincerely,
Globalization Task Team

Globalization has led to changes in production processes with production fragmented across economies in a production chain between resident and non-resident firms—the basis of global value chains (GVC). To better account for interlinked core production activities and supporting services activities, the GN does not recommend any changes to the core System of National Accounts 2008 (2008 SNA) and the Balance of Payments and International Investment Position Manual, sixth edition (BPM6) concepts. It rather supports including a description of GVCs and Trade in Value Added (TiVA) in the next set of manuals as well as developing supplementary information for analysis to help motivate greater uptake.

Within the SNA, to better understand GVC at a global level, the GN favors building (i) TiVA indicators, (ii) GVC satellite account, and (iii) more granularity using the extended supply and use tables (eSUTs). Within the BPM, supplemental cross-border statistics detailed by geography or product are proposed, and have been agreed by the IMF's Committee of Balance of Payments Statistics – see BOPCOM19/04 page 26 and table 3A of the GN.
