

# National Accounts Statistics: Analysis of Main Aggregates, 2015

**Department of Economic and Social Affairs**  
Statistics Division

# **National Accounts Statistics: Analysis of Main Aggregates, 2015**

**United Nations**  
**New York, 2017**

The Department of Economic and Social Affairs of the United Nations Secretariat is a vital interface between global policies in the economic, social and environmental spheres and national action. The Department works in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which States Members of the United Nations draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

#### NOTE

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates reference to a United Nations document. The first 14 editions of this publication were issued without series symbols.

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Where the designation “country” appears in the headings of tables, it covers countries, territories, or areas.

# I. INTRODUCTION

## A. BACKGROUND

1. This is the forty-sixth issue of *National Accounts Statistics: Analysis of Main Aggregates*<sup>1,2</sup> presenting a series of analytical national accounts tables for more than 200 countries and areas of the world. Like the previous issues, it has been prepared by the Statistics Division of the Department for Economic and Social Affairs of the United Nations Secretariat with the generous co-operation of national statistical offices. It is issued in accordance with the recommendation of the Statistical Commission at its first session<sup>3</sup> that the Statistics Division should publish regularly the most recent available data on national accounts for as many countries and areas as possible.

2. This publication presents, in the form of analytical tables, a summary of the principal national accounts aggregates. These aggregates, based on official national account data and thus reported directly by countries to the Statistics Division, are supplemented with estimates prepared by the Statistics Division. The sources and methods used for each country's national accounts aggregates should be taken into consideration when using the data in this publication. Information on metadata is available on the Statistics Division website at: <http://unstats.un.org/unsd/snaama/metasearch.asp>

3. The *National Accounts Statistics: Analysis of Main Aggregates* publication is published as the complementary part of the series of publications on national account data by the Statistics Division. The first part of this series is the *National Accounts Statistics: Main Aggregates and Detailed Tables*<sup>4,5</sup>, which shows detailed national accounts statistics provided to the United Nations as official data. Prior to 1982, detailed national accounts statistics and analytical national accounts tables were published as two volumes of a single publication, the *Yearbook of National Accounts Statistics*.

## B. SYSTEM OF NATIONAL ACCOUNTS

4. This publication is the seventeenth issue based on the United Nations National Accounts Questionnaire (NAQ) introduced in October 1999, which in turn is based on the *System of National Accounts 1993* (1993 SNA)<sup>6</sup>.

5. The 1993 SNA was unanimously recommended to the United Nations Economic and Social Council by its Statistical Commission at its 24th session in March 1993. Similar to the recommendation made in 1968 for its predecessor, *A System of National Accounts* (1968 SNA)<sup>7</sup>, the Council in its resolution 1993/5 of 12 July 1993 recommends that Member States use the 1993 SNA in the

international reporting of comparable national accounts data. However, it should be highlighted that the Council went a few steps further in 1993 and also recommends that Member States consider using the 1993 SNA: (a) as the standard for the compilation of their national accounts statistics, (b) to promote the integration of economic and related statistics, and (c) as an analytical tool. In 2003 the Statistical Commission called for an update of the 1993 SNA. The first 17 Chapters of the updated SNA, comprising the accounting rules, the accounts and tables, and their integration was approved by the Statistical Commission in 2008; Chapters 18 to 29, comprising the interpretations and extensions of the accounts and tables of the System, was approved by the Statistical Commission in 2009. The updated SNA, called the *System of National Accounts 2008* (2008 SNA)<sup>8</sup> was finalised in September 2009 and is available on the Statistics Division's website at: <http://unstats.un.org/unsd/nationalaccount/sna2008.asp>. As of 2016, 75 countries/territories (European Union Member States, Albania, Argentina, Armenia, Australia, Brazil, Brunei Darussalam, Canada, China (mainland), China, Hong Kong SAR, China, Macao SAR, Costa Rica, Dominican Republic, Ecuador, Fiji, Iceland, India, Indonesia, Israel, Kenya, Lao People's Democratic Republic, Malaysia, Mexico, Mongolia, Montenegro, Morocco, New Zealand, Nigeria, Norway, Pakistan, Peru, Philippines, Republic of Korea, Saudi Arabia, Serbia, Singapore, Sint Maarten, South Africa, Sri Lanka, Swaziland, Switzerland, TFYR of Macedonia, Thailand, Timor-Leste, Uganda, Ukraine, the United States of America and Zambia) have started submitting data according to the 2008 SNA. In addition, Kosovo, Japan, Liechtenstein and United Arab Emirates national statistics office has national accounts data in 2008 SNA and they were used for preparing 2015 AMA estimates. Overall, 194 countries/territories representing almost 99 percent of the world's gross national income (GNI), and 96 percent of the world population had implemented 1993 SNA or 2008 SNA.

7. The form and concepts of the statistical tables in the present publication generally conform to the 1993 SNA recommendations.

## C. SCOPE OF PUBLICATION

8. The tables of the publication include analysis of data on gross domestic product (GDP) by different structural components. The types of analysis presented are classified into four major categories listed below:

*I: Analysis of the level of total and per capita GDP*

Table 1.A Estimates of gross domestic product in United States dollars by major area, region and country

Table 1.B Estimates of per capita gross domestic product in United States dollars by major area, region and country

*II: Analysis of the percentage shares of GDP by type of expenditure and gross value added by kind of economic activity*

Table 2 Gross domestic product by type of expenditure

Table 3 Gross value added by kind of economic activity

*III: Analysis of economic development expressed in terms of real growth of GDP and its components by type of expenditure and gross value added by kind of economic activity*

Table 4 Average rate of growth of gross domestic product by major area, region and country

Table 5.A – 5.E Average rate of growth of components of gross domestic product by type of expenditure

Table 6.A – 6.G Average rate of growth of value added by kind of economic activity

*IV: Analysis of price development reflected by implicit price deflators of GDP*

Table 7 Implicit price deflators of gross domestic product

9. The analytical tables presented in this publication are based on a homogeneous data series for each country. These data series are based on official data and estimations that have been applied to produce a consistent time series for each country. The design of these data tables facilitates cross-table analysis, as well as, analysis and comparisons of multiple countries or regions.

10. The data provided in this publication, as well as additional analytical data, are available on the Statistics Division website at <http://unstats.un.org/unsd/snaama> or <http://data.un.org>.

## **D. COLLECTION OF DATA**

11. To collect national accounts data, the Statistics Division annually sends the United Nations National Accounts Questionnaire (UN-NAQ) to countries and areas. The countries are requested to provide the latest available national accounts estimates and to indicate where the scope and coverage of the country estimates differ for conceptual or statistical reasons from the definitions and classifications recommended by the 1993 SNA. This additional metadata information is requested to provide a brief overview of the sources and methods of the compilation of national accounts. For countries for which data are not directly reported to the Statistics Division, data are supplemented by information gathered from additional correspondence

with national statistical offices, from national source publications and other sources (see Section II).

12. In order to reduce the reporting burden of countries, UNSD obtains data from the Organisation for Economic Cooperation and Development (OECD), the United Nations Economic Commission for Europe (ECE) and the Caribbean Community (CARICOM) on behalf of their constituents.

## **E. COMPARABILITY OF THE NATIONAL ESTIMATES**

13. Every effort has been made to present the estimates of the various countries or areas in a form designed to facilitate international comparability. To this end, important differences in concept, scope, coverage and classification have been described in the footnotes for individual countries. Such differences should be taken into account to avoid misleading comparisons.

14. Data contained in the tables relate to the calendar year t for which they are shown, except in the following cases:

A: Year beginning 1 July, t; ending 30 June, t+1  
Australia, Sudan and Former Yemen Arab Republic

B: Year beginning 1 April, t; ending 31 March, t+1  
India, Myanmar and New Zealand

C: Year beginning 21 March, t; ending 20 March, t+1  
Afghanistan and the Islamic Republic of Iran

D: Year beginning 1 July, t-1; ending 30 June, t  
Bangladesh, Egypt, Nauru, Pakistan, Puerto Rico and Tonga

E: Year beginning 8 July, t-1; ending 7 July, t  
Ethiopia and Former Ethiopia

F: Year beginning 16 July, t-1; ending 15 July, t  
Nepal

G: Year beginning 1 October, t-1; ending 30 September, t  
Haiti, Marshall Islands and Micronesia (Federated States of)

## **F. NOMENCLATURE**

15. The information for the countries and areas shown in this publication reflect what is provided to the Statistics Division as of December 2016.

16. Designations, which have changed in recent years, are as follows:

China, Hong Kong SAR - Pursuant to a Joint Declaration signed on 19 December 1984, the United Kingdom restored Hong Kong to the People's Republic of China with effect from 1 July 1997; the People's Republic of China resumed the exercise of sovereignty over the territory on that date.

China, Macao SAR - Pursuant to a Joint Declaration signed on 13 April 1987, Portugal restored Macao to the People's Republic of China with effect from 20 December 1999; the People's Republic of China resumed the exercise of sovereignty over the territory on that date.

Zaire - All data for the former Zaire are shown under the country name of Democratic Republic of the Congo.

Czech Republic, Slovakia - Data for Czech Republic and Slovakia are shown separately under the appropriate country name. For period prior to 1 January 1993, data for the former Czechoslovakia are shown under the country name Czechoslovakia (Former).

Yugoslavia (Former) - Following the adoption and the promulgation of the Constitutional Charter of Serbia and Montenegro by the Assembly of the Federal Republic of Yugoslavia on 4 February 2003, the name of the State of the Federal Republic of Yugoslavia was changed to Serbia and Montenegro. All data for former Yugoslavia prior to 1 January 1992 refer to the Socialist Federal Republic of Yugoslavia that was then composed of six republics. After that date, when available, data for the republics, Bosnia and Herzegovina, Croatia, Slovenia and The Former Yugoslav Republic of Macedonia are shown separately. On 3 June 2006, Serbia and Montenegro formally dissolved into Montenegro and Serbia which are now shown separately from 1990 onwards. Kosovo, formally part of Serbia, is compiling its own National Accounts Statistics and included as a separate territory in this issue, starting in 1990.

USSR (Former) - In 1991, the Union of Soviet Socialist Republics formally dissolved into fifteen independent republics (Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan). When available, data are shown for the individual republics. All data for the former USSR are shown under the country name USSR (Former).

Germany - On October 1990, the Federal Republic of Germany and the German Democratic Republic united to form one sovereign State under the designation Germany.

Yemen - In May 1990, Yemen and Democratic Yemen united to form a single State. Since that date they have been represented as one country with the name "Yemen".

Ethiopia, Eritrea - In 1993 Eritrea separated from Ethiopia to form a new state. Ethiopia refers to Ethiopia excluding Eritrea while Ethiopia (Former) refers to Ethiopia including Eritrea.

Sudan, South Sudan - In 2011 South Sudan separated from Sudan to form a new country. Sudan refers to Sudan excluding South Sudan while Sudan (Former) refers to Sudan including South Sudan.

Netherlands Antilles - In 2010 the Netherlands Antilles dissolved into three separate entities within the Netherlands. Curaçao and Sint Maarten each became constituent entities that provide data separately while Bonaire, Sint Eustatius and Saba became have been integrated into the Netherlands as special municipalities.

## G. COUNTRY COVERAGE

17. The 1993 SNA defines economic territory as the relevant geographical area to which the concept of residence is applied. The 1993 SNA also indicates that the economic territory and geographical territory can be different. Within the analytical tables, the economic territory is usually consistent with the geographic territory; the exceptions include:

France - Includes French Guiana, Guadeloupe, Martinique, Mayotte and Réunion.

Cyprus - Excludes Northern Cyprus.

Serbia - Excludes Kosovo from 1999 onward.

United Republic of Tanzania - Excludes Zanzibar.

Morocco - Includes Western Sahara.

Indonesia - Excludes Timor-Leste from 1999 onward.

China - China is published in this yearbook in three sections: China (mainland); China, Hong Kong SAR; and China, Macao SAR.

## H. COUNTRY GROUPINGS

18. There are two types of country groupings (or aggregates) presented in the tables: economic groupings and regional groupings. The tables of GDP and growth rates of GDP (Tables 1, 4, 5 and 6) include aggregations of data by economic and regional groupings as well as individual country data. Countries are presented alphabetically by region. The tables of percentage share of components of GDP and gross value added and the implicit

price deflators (Tables 2, 3 and 7) only include individual country data presented alphabetically by region.

19. Standard country and area designations, as well as a basic classification of economic and regional groupings are posted on the United Nations website, <http://mdgs.un.org/unsd/mdg/Host.aspx?Content=Data/RegionalGroupings.htm>. The designations employed and the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory or area or its authorities, or concerning the delimitation of its frontiers or boundaries. The designation "developed" and "developing" groupings are intended for statistical convenience and do not necessarily express a judgment about the stage reached by a particular country or area in the development process.

20. A description of the economic and regional classifications employed in this publication is listed below:

#### **World**

Total of developed, developing and transition economies

#### **Developed economies**

Northern America, Europe (excluding Transition Economies in Europe), Japan, Australia and New Zealand

#### **Developing economies**

Africa, Americas excluding Northern America, Caribbean, Central America, South America, Asia excluding Japan and Transition Economies in Asia, and Oceania excluding Australia and New Zealand

#### **Transition economies**

##### ***Commonwealth of Independent Countries***

Armenia, Azerbaijan, Belarus, Kazakhstan, Kyrgyzstan, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan

##### ***Other Asia***

Georgia

##### ***Other Europe***

Albania, Bosnia and Herzegovina, Croatia, Kosovo, Montenegro, Serbia, The Former Yugoslav Republic of Macedonia

### REGIONAL CLASSIFICATION

**Africa** – comprised of Eastern Africa, Middle Africa, Northern Africa, Southern Africa and Western Africa

**Eastern Africa** – Burundi, Comoros, Djibouti, Eritrea\*, Ethiopia\*, Kenya, Madagascar, Malawi, Mauritius, Mozambique, Rwanda, Seychelles, Somalia, South Sudan†,

Uganda, United Republic of Tanzania (mainland), Zambia, Zanzibar, Zimbabwe

**Middle Africa** – Angola, Cameroon, Central African Republic, Chad, Congo, Democratic Republic of the Congo, Equatorial Guinea, Gabon, Sao Tome and Principe

**Northern Africa** – Algeria, Egypt, Libyan Arab Jamahiriya, Morocco, Sudan, Tunisia

**Southern Africa** – Botswana, Lesotho, Namibia, South Africa, Swaziland

**Western Africa** – Benin, Burkina Faso, Cabo Verde, Cote d'Ivoire, Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mali, Mauritania, Niger, Nigeria, Senegal, Sierra Leone, Togo

**Americas** – comprised of Caribbean, Central America, South America and Northern America

**Caribbean** – Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, British Virgin Islands, Cayman Islands, Cuba, Curaçao††, Dominica, Dominican Republic, Grenada, Haiti, Jamaica, Montserrat, Puerto Rico, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Sint Maarten (Dutch part)††, Trinidad and Tobago, Turks and Caicos Islands

**Central America** – Belize, Costa Rica, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, Panama

**South America** – Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela (Bolivarian Republic of)

**Northern America** – Bermuda, Canada, Greenland and United States of America

**Asia** – comprised of Central Asia, Eastern Asia, South-Eastern Asia, Southern Asia and Western Asia

**Central Asia** – Kazakhstan\*, Kyrgyzstan\*, Tajikistan\*, Turkmenistan\*, Uzbekistan\*

**Eastern Asia** – China, Hong Kong Special Administrative Region of China, Macao Special Administrative Region of China, Democratic People's Republic of Korea, Japan, Mongolia, Republic of Korea

**South-Eastern Asia** – Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste\*\*, Vietnam

**Southern Asia** – Afghanistan, Bangladesh, Bhutan, India, Iran (Islamic Republic of), Maldives, Nepal, Pakistan, Sri Lanka

**Western Asia** – Armenia\*, Azerbaijan\*, Bahrain, Cyprus, Georgia\*, Iraq, Israel, Jordan, Kuwait, Lebanon, State of Palestine, Oman, Qatar, Saudi Arabia, Syrian Arab Republic, Turkey, United Arab Emirates, Yemen\*

**Europe** – comprised of Eastern Europe, Northern Europe, Southern Europe and Western Europe

**Eastern Europe** – Belarus\*, Bulgaria, Czech Republic\*, Hungary, Poland, Republic of Moldova\*, Romania, Russian Federation\*, Slovakia\*, Ukraine\*

**Southern Europe** – Albania, Andorra, Bosnia and Herzegovina\*, Croatia\*, Greece, Italy, Kosovo\*\*, Malta, Montenegro\*, Portugal, San Marino, Serbia\*, Slovenia, Spain, The former Yugoslav Republic of Macedonia\*

**Northern Europe** – Denmark, Estonia\*, Finland, Iceland, Ireland, Latvia\*, Lithuania\*, Norway, Sweden, United Kingdom of Great Britain and Northern Ireland

**Western Europe** – Austria, Belgium, France, Germany, Liechtenstein, Luxembourg, Monaco, Netherlands and Switzerland

**Oceania** – comprised of Australia and New Zealand, Melanesia, Micronesia, and Polynesia

**Australia and New Zealand** – Australia, New Zealand

**Melanesia** – Fiji, New Caledonia, Papua New Guinea, Solomon Islands, Vanuatu

**Micronesia** – Kiribati, Marshall Islands, Micronesia (Federated States of), Nauru, Palau

**Polynesia** – Cook Islands, French Polynesia, Samoa, Tonga, Tuvalu

## I. REVISIONS

21. The figures shown are the most recent estimates and revisions available at the time of compilation. In general, figures for the most recent year are to be regarded as provisional.

## J. SYMBOLS AND DATA DISPLAY

22. The following symbols have been employed:

Data not available	...
Category not available	..
Data in units	(u)
Data in thousands	(t)

23. The sum of the components in the tables may not necessarily add up to totals shown because of rounding.

## K. GENERAL INFORMATION

24. For further information visit the Statistics Division website at <http://unstats.un.org/unsd/snaama>. Queries regarding the AMA database or this publication can be sent to [sna@un.org](mailto:sna@un.org).

\* since 1990

\*\* since 1999

† since 2008

†† since 2010

## II. ESTIMATION METHODS

### A. BACKGROUND

1. This section outlines the methodology employed to obtain a complete data series for each country, as well as for computing growth rates, indices and the economic and regional aggregates.

2. A basic description of the methodology related to the compilation of official national accounts data is provided in *National Accounts Statistics: Main Aggregates and Detailed Tables*. For full details on the 1968, 1993 or 2008 SNA, see *A System of National Accounts* (1968 SNA), *System of National Accounts 1993* (1993 SNA) and *System of National Accounts 2008* (2008 SNA).

3. The System of National Accounts (SNA) consists of a coherent, consistent and integrated set of macroeconomic accounts; balance sheets and tables based on a set of internationally agreed concepts, definitions, classifications and accounting rules. It provides a comprehensive accounting framework within which economic data can be compiled and presented in a format that is designed for purposes of economic analysis, decision-taking and policy-making. The accounts themselves present in a condensed way a great mass of detailed information, organized according to economic principles and perceptions, about the working of an economy. They provide a comprehensive and detailed record of the complex economic activities taking place within an economy and of the interaction between the different economic agents, and groups of agents that takes place on markets or elsewhere. In practice the accounts are compiled for a succession of time periods, thus providing a continuing flow of information that is indispensable for the monitoring, analysis and evaluation of the performance of an economy over time. The SNA provides information not only about economic activities, but also about the levels of an economy's productive assets and the wealth of its inhabitants at particular points of time. Finally, the SNA includes an external account that displays the links between an economy and the rest of the world.

### B. DATA SOURCES FOR ESTIMATION IN NATIONAL CURRENCY

4. Official data, as reported by countries to the United Nations through the Statistics Division's annual UN-NAQ, are published in the *National Accounts Statistics: Main Aggregates and Detailed Tables* publication.

5. For many countries a full set of official data is not available, thus estimation procedures are employed to obtain estimates for the entire time series. When full data is not available, a hierarchy of other data sources is used to gather information on the national accounts of a country. The data gathered are then either used directly or estimation procedures are applied to obtain the basic statistics presented in this publication.

#### B.1 HIERARCHY OF DATA SOURCES

6. If official data are not available, the selection of data sources is based on following hierarchy:

- 1) Official publications and websites of national statistical offices, central banks or relevant government ministries;
- 2) Official statistics disseminated by Eurostat, European Central Bank and the Organization for Economic Cooperation and Development (OECD) for their members;
- 3) Information provided by Permanent Missions to the United Nations;
- 4) Economic surveys and estimates prepared by United Nations' Regional Economic Commissions (i.e. UNECE, ECLAC, ESCAP, UNECA and ESCWA);
- 5) Publications of international organizations with a strong focus on statistical data collection (including regional development banks). The most common sources used for their respective countries are listed below.

**Asia:** Asian Development Bank, ASEAN, Arab Monetary Fund, Secretariat of the Pacific Community

**Africa:** African Development Bank, Afristat, Banque des Etats de l'Afrique Centrale (BEAC), Union Economique Monetaire Ouest Africain (UEMOA)

**Americas:** CARICOM, Caribbean Development Bank, Eastern Caribbean Central Bank (ECCB)

**Other:** OECD for some non-member countries, Statistical Committee of the Commonwealth of Independent States

- 6) Estimates and indicators from other international organizations. The most common sources used are: the International Monetary Fund (IMF) and the World Bank;
- 7) Publications or websites of specialized groups, the most common sources used are: the Gulf Cooperation Council, the Asia-Pacific Economic Cooperation (APEC), the Committee of Central Bank Governors in SADC; the Islamic Development Bank, and the Statistical Training Centre for Islamic Countries;
- 8) Economic data from commercial providers and other sources, the most common sources used are: the Economic Intelligence Unit and the United States Central Intelligence Agency;
- 9) Information from neighbouring countries where no alternative source is available (Switzerland for Liechtenstein; France for Monaco; Italy for San Marino; Spain for Andorra; and some Pacific Islands for other Pacific Islands).

### **C. BACKCASTING OF OFFICIAL DATA**

7. From time to time countries provide revised data without revising a full historical time series. In these cases the data series are backcasted to derive a single, consistent time series.
8. Official data are often reported as multiple sets of time series versions. Each time series version represents a unique methodology used to compile the national accounts data (for example, a difference between two time series versions could reflect a change in currency, a switch from 1968 SNA to 1993 SNA, a change in the office responsible for compiling national accounts, etc.). These time series versions may not be comparable, especially when a country has shifted from the 1968 SNA to 1993 SNA or 2008 SNA.
9. When a single time series version does not exist for the entire period (1970 to t-1), then estimation procedures are used to backcast the most recently reported time series version. Backcasting is only performed when time series overlap for at least one year. The overlapping year is used to create a ratio; this ratio is then applied backwards to the previous time series version. Note that if there is a change of fiscal year between two official data time series, the older series are converted to the fiscal year type of the most recent time series prior to backcasting.

10. The same backcasting methods are applied when constant price time series versions include multiple base years or when constant price time series versions are reported as constant prices of the previous year (CPY). CPY data are backcasted by using the officially reported current price data and the officially reported constant price data. The data are backcasted into a single series with a fixed base year.

### **D. ESTIMATION BASED ON SOURCES OTHER THAN OFFICIAL DATA**

11. The methods involved in preparing data estimates using sources other than official data include trend extrapolation, using appropriate indices for inflating or deflating relevant data series, and share distribution of GDP. A hierarchical assessment is followed to determine which method should be used. Effort is made to keep data estimation methods consistent from year to year.

#### *D.1 TREND EXTRAPOLATION*

12. Trend extrapolation is the most frequent method used for estimating data. The trend from an alternative data source is applied to official data or other estimates by applying the growth rate forward or backward (data sources are used according to the hierarchy described in section B).

13. Trend extrapolation can also be used to form a bridge between two official data series for the purpose of backcasting. This is done when an overlapping year does not exist between two official data time series versions. The alternative source is used to create a time series version that includes an overlapping year with a second official data time series version. The backcasting procedures are then followed using this overlapping year.

14. In some cases there is no source available for some of the years in the estimation period. In these cases the average trend of the several years preceding or following a data item is used to extrapolate a value for a specific year. If there is missing data for the components of GDP for a period of time in the middle of the time series, then half of the missing years are calculated using the preceding years and the other half are calculated using the following years (when the gap covers an odd number of years then the middle year is calculated as the average of the preceding and following years).

#### *D.2 PRICE INDICES*

15. In cases when either data at current prices or constant prices are missing, an appropriate price index may be used to deflate or inflate the relevant data to obtain the missing data. This method is applied only when

other reliable data sources are not available. Under this method, GDP is deflated or inflated based on a price index and the components of GDP are calculated using the share to GDP.

### D.3 SHARE DISTRIBUTION OF GDP

16. Another method for filling in data gaps is to apply the share distribution of GDP. Candidates for this method are countries where official GDP data exist, but data for some or all components are missing. This method requires a secondary data source for GDP and a breakdown of components. If the information is comparable, the share distribution of GDP from the secondary source is applied to the official GDP data.

17. If a secondary source is not available, but some of the years of available data include a breakdown by component, then the average share of the preceding or following five-year period is used to estimate missing data. If there are missing data for the components of GDP for a period of time in the middle of the time series, then half of the missing years are calculated using the preceding five years and the other half are calculated using the following five years (when the gap covers an odd number of years then the middle year is calculated as the average of the preceding and following five years).

### E. CONVERSION TO UNITED STATES DOLLARS

18. GDP and per capita GDP data are converted to US dollars using appropriate annual monthly-average or annual average end-of month quotations of exchange rates. As a rule, market exchange rates (MERs) obtained from the International Monetary Fund publication, *International Financial Statistics* are used. These MERs are averages of the market rates communicated to the International Monetary Fund by the Monetary Authority of each member country or end-of-month quotations in the market of the country. MERs generally consist of three types of rates: a) market rates, determined largely by market forces; b) official rates, determined by government authorities; and c) principal rates, for countries maintaining multiple exchange rates arrangements.

19. When MERs from the International Monetary Fund are not available United Nations operational rates of exchange are used (United Nations operational rates were established for accounting purposes and are used in official transactions of the United Nations). These rates are based on official, commercial and/or tourist rates of exchange.

20. National Accounts data expressed in US dollars need to be used with caution as the data may be distorted

by fluctuations in exchange rates and domestic inflation movements. To minimise such distortions, the data are examined to identify countries for which changes in the per capita GDP converted in US dollars are not consistent with the economic developments in the country as reflected by the relative movements of domestic and international inflation. To identify these countries, the GDP per capita of each country is evaluated.

21. A MER valuation index (MVI) is calculated for each country in order to review changes in the MER using the following formula:

Assuming,

$$r = \text{growth rate of per capita GDP between periods 1 and 2}$$

$$P_{US} = \text{price changes in the US}$$

$$E(Y_2) = \text{expected per capita GDP (in US\$) in period 2}$$

$$Y_1 = \text{per capita GDP in period 1}$$

Then,

$$E(Y_2) = r \times P_{US} \times Y_1$$

and

$$MVI = Y_2 / E(Y_2)$$

The MER of countries with an MVI above 1.2 or below 0.8 are considered for adjustment. For each country, graphs of the per capita GDP and the growth of the MVI over time are also evaluated to support the outcome of the numerical analysis.

22. Once possible countries for MER adjustment have been identified, each case is carefully considered taking into account the economic situation in each country during the identified period.

23. The assumption is that changes in the exchange rate of a country between two periods reflect changes in domestic prices relative to changes in United States prices. Taking this assumption into consideration price adjusted rates of exchange (PARE) are calculated for year  $t$  by adjusting the exchange rate in year  $t+n$  with the changes, between year  $t$  and  $t+n$ , in the GDP deflator in national currency units relative to the US GDP deflator, where year  $t+n$  is a year with a realistic GDP per capita expressed in US dollars (for example, the year after an economic crisis ended). The PARE rate is calculated using the following formula:

Assume,

$X_t$  = exchange rate for year  $t$

$C_t$  = current price GDP for year  $t$

$K_t$  = constant price GDP for year  $t$

$d_t$  = deflator for year  $t$

Then,

$$d_t = \frac{c_t}{k_t}$$

and

$$PARE_t = \frac{x_{t+n}}{\left( \frac{d_{t+n}/d_t}{\frac{d_{t+n}^{US}}{d_t^{US}}} \right)}$$

Where  $d_t^{US}$  = deflator for the United States for year  $t$

24. For example: a country's GDP per capita in 1987 was 11,300 US dollars, while it was 549 in 1979 and 663 in 1990. Between 1984 and 1989 the country suffered from hyperinflation while MERs were not allowed to adjust adequately to market prices. Using 1990 as a base year and applying the PARE rates backwards to 1980 results in a GDP per capita series with a more plausible value of 740 for 1987, the year in question.

25. Notwithstanding these adjustments, the inter-country comparisons of national accounts data expressed in US dollars should be done with caution as all distortions may not be eliminated.

## F. CONVERSION TO 2005 PRICES

26. Once all data have been compiled in national currency, the constant price data are converted to 2005

prices. Constant price data in national currency are converted to US dollars using the 2005 exchange rates.

## G. ECONOMIC AND REGIONAL AGGREGATES

27. The economic and regional aggregates are defined as the sum of the data in US dollars for the countries, areas and territories within the economic or regional grouping. The growth rates and implicit price deflators are calculated from the economic and regional aggregates, not as an average of the country-level growth rates or implicit price deflators.

## H. DATA QUALITY

28. All official data received by the United Nations Statistics Division are checked for errors prior to incorporation in the United Nations official data database. The checking involves ensuring that aggregate indicators are equal to the sum of their components and that indicators which are provided in multiple tables are represented consistently. Footnotes are added to the data when necessary.

29. Similarly, the estimated data in this yearbook are checked for consistency by ensuring that aggregate indicators are equal to the sum of their components and that indicators which are represented in multiple tables are represented consistently. The estimates derived for each year are compared to previous years to ensure that estimates are prepared consistently from year to year. Additionally, the growth rate from year to year is analyzed to identify anomalies in the data.

### **III. Analytical Tables**

#### **A. Estimates of Main National Accounts Aggregates at Current Prices**

## **Description of Analysis in Table 1A and Table 1B**

### *A. Level of total and per capita gross domestic product.*

Table 1A and Table 1B present estimates of total and per capita gross domestic product (GDP) expressed in current US dollars. The tables are intended to facilitate international comparisons of levels of income generated in production. Aggregations of data by economic and regional groupings as well as individual country data presented alphabetically by region are shown in rows. The columns list total and per capita GDP in terms of US dollars for 1970, 1980, 1990, 2000 and 2010 through 2015.

Official data and estimates of total and per capita GDP have been converted to US dollars as described

in the section II (Estimation methods) of this publication.

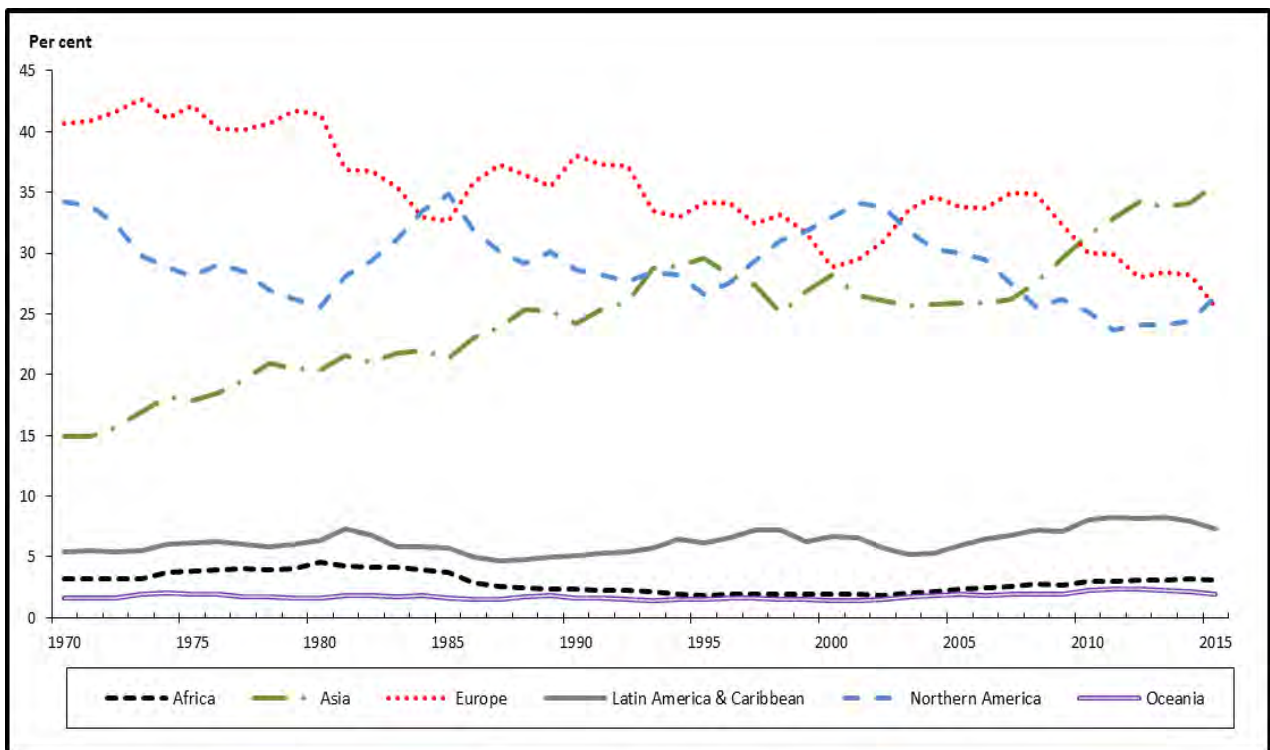

For inter-country comparisons over time, it would be more appropriate to use the growth rate information based on constant price data, presented in Table 4 of the present volume, which are more indicative of inter-country and intra-grouping comparisons of trends in total GDP.

The nominal gross domestic product for each geographic region since 1970 (in billions of US dollars) and the share in world GDP of each geographic region are shown in the following graphs.

**Figure 1. Nominal gross domestic product by region**

**Figure 2. Share in nominal world GDP by region**

**Notes for Table 1.B. Estimates of Per Capita Gross Domestic Product in US Dollars  
by Major Area, Region and Country**

- 1/ Paraguay  
1990, 2000  
Does not incorporate value added generated by binational hydroelectric plants.
- 2/ Qatar  
1970, 1980, 1990  
Refers to data compiled according to the 1968 SNA.
- 3/ Ukraine  
2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.
- 4/ Serbia  
1990  
Includes data for Kosovo and Metohia

**B. Percentage Distribution of  
Main National Accounts  
Aggregates at Current Prices:  
Individual Countries or Areas**

## Description of Analysis in Tables 2 and 3

### *B. Economic structure expressed in terms of percentage shares of gross domestic product and gross value added.*

The tables included in this section of the publication disaggregate GDP and gross value added at current prices into component parts and express these as percentage shares that outline the economic structures in countries. The years of coverage are 1970, 1975, 1980, 1985, 1990, 1995, 2000, 2005, and 2006 through 2015.

GDP estimates by type of expenditure are shown in Table 2 and gross value added by kind of economic activity in Table 3. Differences in the concepts and coverage in classifications used are indicated in the footnotes. Both tables are designed to provide an overview of the structure of the economic system expressed in current prices.

GDP and gross value added estimates of the countries are expressed in millions of the national currency as indicated in the first column of Table 2 and Table 3, respectively. For tabulation purposes, the values of the GDP and gross value added estimates of some countries prior to a high inflation period might be qualified with unit (u) or thousand (t) to reflect the measurement in a single unit or thousand of units of national currency.

Table 2 features the distribution of GDP based on expenditure components. It shows what portion of income from production is spent by households or government on final consumption, what is spent on investment, and what part of GDP is exported after deducting the expenditures on imports.

It is noted that in some instances the shares for changes in inventories should be used with caution as countries may also include items such as statistical errors.

Table 3 presents the shares of the components of gross value added by kind of economic activity (in terms of ISIC Rev 3.1):

- Agriculture, hunting, forestry and fishing (ISIC A-B)

- Mining and quarrying, Manufacturing, Electricity, gas and water supply (ISIC C-E) Manufacturing (ISIC D) as a separate activity)
- Construction (ISIC F)
- Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods, Hotels and restaurants (ISIC G-H)
- Transport, storage and communications (ISIC I)
- Other activities which includes Financial intermediation, Real estate, renting and business activities, Public administration and defense; compulsory social security, Education, Health and social work, Other community, social and personal service activities, Private households with employed persons (ISIC J-P)

The distributive shares of gross value added are presented from each economic activity based on the classification by tabulation category of the International Standard Industrial Classification (ISIC 3) of all Economic Activities. This table reflects the economic structure of production in the country. For example, it identifies the value-added shares from different sources of production, e.g., oil, gas and other minerals. It also illustrates that many developing countries heavily depend on income mainly originating in agriculture, while relatively more developed countries generate a much larger portion of income in the industrial and services activities.

Note that the breakdown in shares of GDP in current prices by type of expenditure in Table 2 might not add up to 100 per cent due to statistical discrepancies.

The breakdown of nominal world GDP by type of expenditure and nominal world value added in current prices by type of economic activity since 1970 are shown in the following graphs.

Figure 3. Share in nominal world GDP by type of expenditure

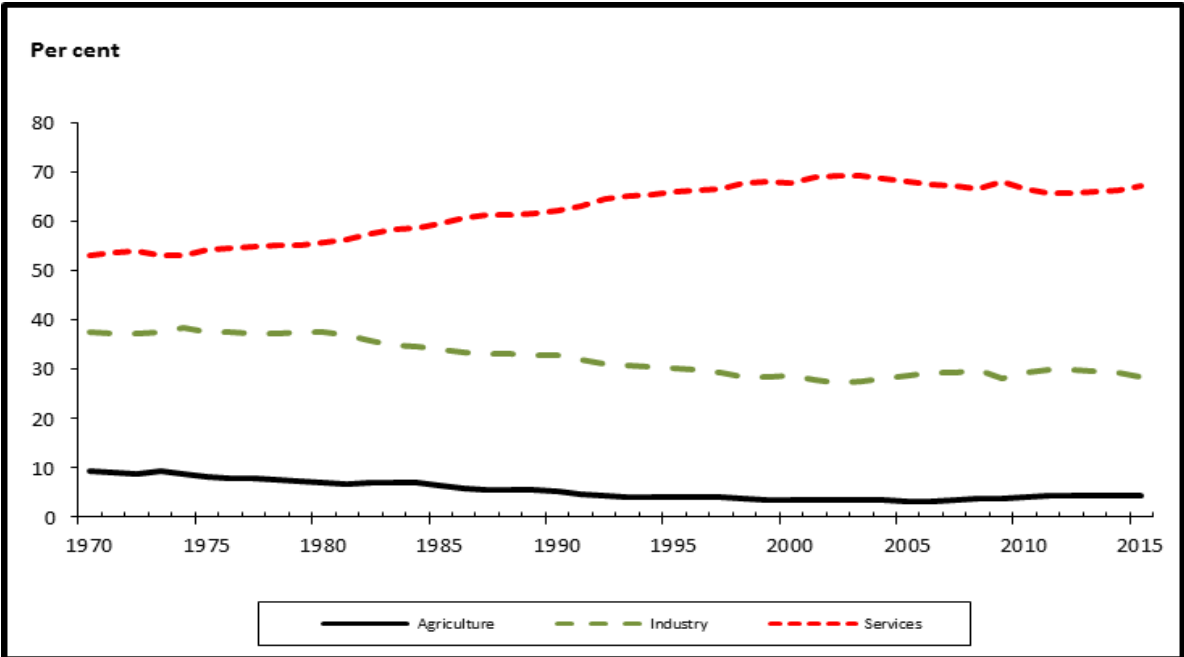

Figure 4. Share in nominal gross value added by kind of economic activity

**Table 2. Gross Domestic Product by Type of Expenditure:  
Individual Countries or Areas**

**Notes for Table 2. Gross Domestic Product by Type of Expenditure:  
Individual Countries or Areas**

- 1/ Botswana  
General government final consumption expenditure  
2005-2015  
Excludes individual consumption of general government.
- 2/ Somalia
- (a) General government final consumption expenditure  
1980, 1985, 1990, 1995  
Includes the value of technical assistance from abroad.
- (b) Exports of goods and services  
1970, 1975, 1980, 1985, 1990, 1995  
Exports of goods only.
- (c) Imports of goods and services  
1970, 1975, 1980, 1985, 1990, 1995  
Refers to imports of goods and non-factor services.
- 3/ Bolivia (Plurinational State of)  
General government final consumption expenditure  
2000, 2005-2015  
Excludes individual consumption of general government.
- 4/ Cuba  
General government final consumption expenditure  
2000, 2005-2015  
Includes NPISH final consumption expenditure.
- 5/ Paraguay
- (a) Gross Domestic Product  
1985, 1990, 1995, 2000  
Does not incorporate value added generated by binational hydroelectric plants.
- (b) Exports of goods and services  
1985, 1990, 1995, 2000  
Does not incorporate value added generated by binational hydroelectric plants.
- 6/ Jordan  
General government final consumption expenditure  
1990  
Government final consumption expenditure includes pension payments less employees' pension contributions. Some non-capital development expenditure of the central government is included in fixed capital formation.
- 7/ Lebanon  
Changes in inventories  
2005-2013  
Includes Acquisitions less disposals of valuables.
- 8/ Myanmar
- (a) Exports of goods and services  
1970, 1975, 1980, 1985, 1990, 1995  
Country used official exchange rates rather than market exchange rates in compiling imports and exports data.
- (b) Imports of goods and services  
1970, 1975, 1980, 1985, 1990, 1995  
Country used official exchange rates rather than market exchange rates in compiling imports and exports data.

- 9/ Philippines  
 Gross fixed capital formation  
 1970, 1975, 1980, 1985, 1990, 1995, 2000, 2005-2015  
 Includes intellectual property products.
- 10/ Qatar
- (a) Gross Domestic Product  
 1970, 1975, 1980, 1985, 1990  
 Refers to data compiled according to the 1968 SNA.
  - (b) Household final consumption expenditure  
 1970, 1975, 1980, 1985, 1990  
 Refers to data compiled according to the 1968 SNA.
  - (c) General government final consumption expenditure  
 1970, 1975, 1980, 1985, 1990  
 Refers to data compiled according to the 1968 SNA.
  - (d) Gross fixed capital formation  
 1970, 1975, 1980, 1985, 1990  
 Refers to data compiled according to the 1968 SNA.
  - (e) Changes in inventories  
 1970, 1975, 1980, 1985, 1990  
 Refers to data compiled according to the 1968 SNA.
  - (f) Exports of goods and services  
 1970, 1975, 1980, 1985, 1990  
 Refers to data compiled according to the 1968 SNA.
  - (g) Imports of goods and services  
 1970, 1975, 1980, 1985, 1990  
 Refers to data compiled according to the 1968 SNA.
- 11/ Serbia  
 Gross Domestic Product  
 1990, 1995  
 Includes data for Kosovo and Metohia
- 12/ Ukraine
- (a) Gross Domestic Product  
 2014-2015  
 Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.
  - (b) Household final consumption expenditure  
 2014-2015  
 Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.
  - (c) General government final consumption expenditure  
 2014-2015  
 Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.
  - (d) Gross fixed capital formation  
 2014-2015  
 Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.

- (e) Changes in inventories  
2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.
  
- (f) Exports of goods and services  
2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.
  
- (g) Imports of goods and services  
2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.

**Notes for Table 3. Gross Value Added by Kind of Economic Activity:  
Individual Countries or Areas**

- 1/ Angola  
Gross Value Added  
1970, 1975, 1980, 1985, 1990, 1995, 2000, 2005-2015  
FISIM has not been allocated to intermediate consumption by economic activity.
- 2/ Benin  
Gross Value Added  
1990, 1995, 2000, 2005-2014  
FISIM has not been allocated to intermediate consumption by economic activity.
- 3/ Burkina Faso  
Gross Value Added  
2014-2015  
FISIM has not been allocated to intermediate consumption by economic activity.
- 4/ Burundi  
Gross Value Added  
2005-2015  
FISIM has not been allocated to intermediate consumption by economic activity.
- 5/ Chad  
Gross Value Added  
2005-2015  
FISIM has not been allocated to intermediate consumption by economic activity.
- 6/ Comoros  
Gross Value Added  
1990, 1995, 2000, 2005-2015  
FISIM has not been allocated to intermediate consumption by economic activity.
- 7/ Congo  
Gross Value Added  
1970, 1975, 1980, 1985  
FISIM has not been allocated to intermediate consumption by economic activity.
- 8/ Côte d'Ivoire  
Gross Value Added  
1970, 1975, 1980, 1985, 1990, 1995, 2000  
FISIM has not been allocated to intermediate consumption by economic activity.
- 9/ D.R. of the Congo  
(a) Wholesale, retail trade, restaurants and hotels  
1970, 1975, 1980, 1985, 1990, 1995, 2000, 2005-2015  
Excludes hotels and restaurants  
  
(b) Other Activities  
1970, 1975, 1980, 1985, 1990, 1995, 2000, 2005-2015  
Includes Hotels and restaurants.
- 10/ Djibouti  
(a) Gross Value Added  
1970, 1975, 1980  
At factor cost.  
1970, 1975, 1980, 2008-2013  
FISIM has not been allocated to intermediate consumption by economic activity.  
  
(b) Agriculture, hunting, forestry, fishing  
1985, 1990, 1995  
Excludes hunting.

- (c) Mining, Manufacturing, Utilities  
1985, 1990, 1995  
Excludes gas.
- 11/ Egypt  
Gross Value Added  
1970, 1975, 1980, 1985, 1990, 1995, 2000, 2005-2015  
At factor cost.
- 12/ Equatorial Guinea  
Gross Value Added  
2006-2015  
FISIM has not been allocated to intermediate consumption by economic activity.
- 13/ Ethiopia  
Gross Value Added

**C. Growth Rates of Main National  
Accounts Aggregates at  
Constant 2005 Prices**

## **Description of Analysis in Tables 4, 5 and 6**

### *C. Economic development expressed in rates of growth in real terms of gross domestic product and its components.*

Tables 4 to 6 reflect trends in economic development expressed as rates of real growth of GDP and its components for the world, developed, developing and transition economies, as well as for individual countries or areas during the period 1970 - 2015.

The growth rates of GDP and its components for the regional and economic groupings are obtained from the sum of the GDPs and their components for the countries of a specific regional and economic grouping.

The data shown in these tables are computed as geometric mean of annual growth rates expressed as percentages for the years and periods indicated. Table 4 presents growth rates of total GDP and Tables 5 and 6 show growth rates of the components of GDP by expenditure and by kind of economic activity, respectively.

The first column of the three tables lists the economic and regional groupings as well as individual countries presented alphabetically by region. The next column in each table highlights the base year weights in 2005 of GDP, representing for individual countries' and sub-regions' weights of their GDP as a percentage of the region GDP and those for the regions and economic development groupings, as a percentage of the world GDP. In Tables 5 and 6, the third column presents,

respectively, the shares of each expenditure and industry component as a percentage of GDP in 2005. The next four columns of the tables contain the average growth rates of GDP during the periods 1970-1979, 1980-1989, 1990-1999 and 2000-2009. The remaining columns show the annual rates of growth over the preceding year starting from 2010 through 2015.

Table 5 includes the rates of growth of each expenditure component of GDP as follows: (a) household final consumption expenditure; (b) general government final consumption expenditure; (c) gross fixed capital formation; (d) exports of goods and services; and (e) imports of goods and services.

Table 6 lists the average rates of growth of each economic activity component of GDP: (a) agriculture, hunting, forestry and fishing, (b) mining, manufacturing and utilities, (c) manufacturing, (d) construction, (e) wholesale and retail trade, restaurants and hotels (f) transport, storage and communication and (g) other activities.

Shown in following graphs are the average annual growth rates of real GDP over each of the last four decades as well as over the last five years, GDP in 2005 US dollars and the real GDP index with 1970=100. Each graph displays data by geographic region.

**Figure 5. Average annual growth of real GDP by region**

**Figure 6. Index of real gross domestic product by region**

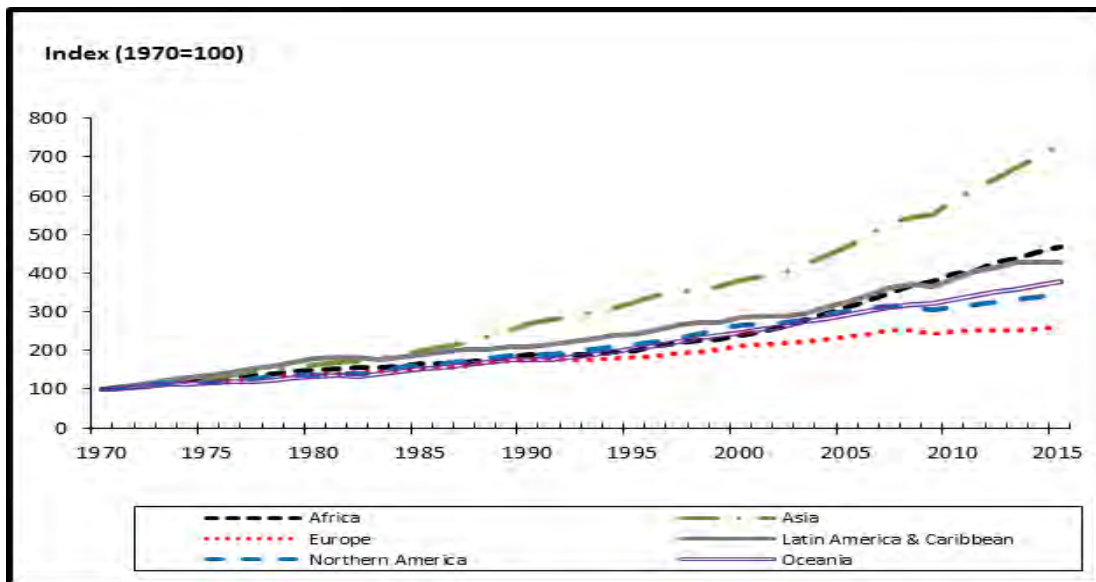

Figure 7. Real gross domestic product by region

**Table 4. Annual Average Rate of Growth of Gross Domestic Product by Major Area, Region and Country**

**Notes for Table 4. Annual Average Rate of Growth of Gross Domestic Product  
by Major Area, Region and Country**

- 1/ Paraguay  
1984-2001  
Does not incorporate value added generated by binational hydroelectric plants.
- 2/ Ukraine  
2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.
- 3/ Serbia  
1990-1998  
Includes data for Kosovo and Metohia

**Table 5.A. Average Rates of Growth of Gross Domestic Product by Expenditure - Household Final Consumption Expenditure**

**Notes for Table 5.B. Average Rates of Growth of Gross Domestic Product by Expenditure -  
General Government Final Consumption Expenditure**

- 1/ Congo  
1970-1988  
Includes NPISH final consumption expenditure.
- 2/ Botswana  
2001-2015  
Excludes individual consumption of general government.
- 3/ Cuba  
1996-2015  
Includes NPISH final consumption expenditure.
- 4/ Bolivia (Plurinational State of)  
1996-2015  
Excludes individual consumption of general government.
- 5/ Ukraine  
2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.

**Notes for Table 5.C. Average Rates of Growth of Gross Domestic Product by Expenditure -  
Gross Fixed Capital Formation**

- 1/ Philippines  
1970-2015  
Includes intellectual property products.
- 2/ Ukraine  
2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.

**Notes for Table 5.D. Average Rates of Growth of Gross Domestic Product by Expenditure - Exports of goods and Services**

- 1/ Paraguay  
1984-2001  
Does not incorporate value added generated by binational hydroelectric plants.
- 2/ Myanmar  
1970-1996  
Country used official exchange rates rather than market exchange rates in compiling imports and exports data.
- 3/ Ukraine  
2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.

**Notes for Table 5.E. Average Rates of Growth of Gross Domestic Product by Expenditure - Imports of goods and services**

- 1/ Myanmar  
1970-1996  
Country used official exchange rates rather than market exchange rates in compiling imports and exports data.
- 2/ Ukraine  
2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.

**Notes for Table 6.A. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity -  
Agriculture, Hunting, Forestry and Fishing**

- 1/ 1970-2015  
Excludes hunting.
- 2/ 1970-2015  
Excludes irrigation canals and landscaping care
- 3/ 2006-2015  
Excludes irrigation canals and landscaping care
- 4/ 2000-2015  
Excludes irrigation canals and landscaping care
- 5/ 2010-2015  
Excludes irrigation canals and landscaping care
- 6/ 1990-2015  
Excludes irrigation canals and landscaping care
- 7/ 1970-2015  
At factor cost.
- 8/ 1970-2015  
Includes Mining and quarrying.
- 9/ 1970-2015  
At producers' prices.
- 10/ 2005-2015  
Includes Mining and quarrying.
- 11/ 1970-2012  
Includes Mining and quarrying.
- 12/ 1970-2001  
At producers' prices.
- 13/ 1970-1989  
At factor cost.
- 14/ 1970-2015  
Includes Taxes less subsidies on production and imports.
- 15/ 1970-2015  
Excludes hunting and forestry.
- 16/ 1970-1995  
At producers' prices.
- 17/ 2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.

**Notes for Table 6.B. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity - Mining, Manufacturing and Utilities**

- 1/ 1970-2015  
Excludes gas.
- 2/ 1970-2015  
Excludes publishing activities, includes irrigation canals
- 3/ 2006-2015  
Excludes publishing activities, includes irrigation canals
- 4/ 2000-2015  
Excludes publishing activities, includes irrigation canals
- 5/ 2010-2015  
Excludes publishing activities, includes irrigation canals
- 6/ 1990-2015  
Excludes publishing activities, includes irrigation canals
- 7/ 1970-2015  
At factor cost.
- 8/ 1970-2015  
Excludes mining and quarrying.
- 9/ 1970-2015  
At producers' prices.
- 10/ 1970-2008  
At producers' prices.
- 11/ 2007-2015  
Includes Construction
- 12/ 1984-2001  
Does not incorporate value added generated by binational hydroelectric plants.
- 13/ 1970-1989  
At factor cost.
- 14/ 1970-2015  
Includes Taxes less subsidies on production and imports.
- 15/ 1970-1995  
At producers' prices.
- 16/ 1976-2014  
At producers' prices.
- 17/ 2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.
- 18/ 1993-2015  
Excludes publishing activities, includes irrigation canals

## Notes for Table 6.C. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity - Manufacturing

- 1/ 1970-2015  
Excludes recycling and publishing activities
- 2/ 2006-2015  
Excludes recycling and publishing activities
- 3/ 2000-2015  
Excludes recycling and publishing activities
- 4/ 2010-2015  
Excludes recycling and publishing activities
- 5/ 1990-2015  
Excludes recycling and publishing activities
- 6/ 1970-2015  
At factor cost.
- 7/ 1970-2015  
Oil refining is included in Electricity, gas and water supply.
- 8/ 1970-2015  
At producers' prices.
- 9/ 1970-2001  
At producers' prices.
- 10/ 1970-1989  
At factor cost.
- 11/ 1970-2015  
Includes Taxes less subsidies on production and imports.
- 12/ 1990-2015  
Includes Mining and quarrying, and Electricity, gas and water supply.
- 13/ 1990-2015  
Includes Mining and quarrying.
- 14/ 2005-2015  
At producers' prices.
- 15/ 1970-1995  
At producers' prices.
- 16/ 1970-2015  
Includes Mining and quarrying.
- 17/ 1990-1992  
Includes Mining and quarrying, and Electricity, gas and water supply.
- 18/ 2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.
- 19/ 1970-2015  
Includes Mining and quarrying, and Electricity, gas and water supply. Excludes recycling and publishing activities

- 20/ 1978-2015  
At factor cost.
- 21/ 1980-1990  
Includes Mining and quarrying.

**Notes for Table 6.D. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity -  
Construction**

- 1/ 1970-2015  
At factor cost.
- 2/ 1970-2015  
Refers to Buildings and public works
- 3/ 1970-2015  
At producers' prices.
- 4/ 1970-2001  
At producers' prices.
- 5/ 1970-1989  
At factor cost.
- 6/ 1970-2015  
Includes Mining and quarrying.
- 7/ 1970-2015  
Includes Taxes less subsidies on production and imports.
- 8/ 1970-1995  
At producers' prices.
- 9/ 2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.
- 10/ 2009-2015  
Includes Electricity, gas and water supply.

**Notes for Table 6.E. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity -  
Wholesale, retail trade, restaurants and hotels**

- 1/ 1970-2015  
Excludes repair of personal and household goods
- 2/ 2006-2015  
Excludes repair of personal and household goods
- 3/ 2000-2015  
Excludes repair of personal and household goods
- 4/ 2010-2015  
Excludes repair of personal and household goods
- 5/ 1990-2015  
Excludes repair of personal and household goods
- 6/ 1970-2015  
Excludes hotels and restaurants
- 7/ 1970-2015  
At factor cost.
- 8/ 1970-2015  
Refers to trade only
- 9/ 1970-2015  
At producers' prices.
- 10/ 1970-2001  
At producers' prices.
- 11/ 1970-1989  
At factor cost.
- 12/ 1970-2015  
Includes Taxes less subsidies on production and imports.
- 13/ 1970-2015  
Excludes repair of motor vehicles and motorcycles, personal and household goods.
- 14/ 1970-1995  
At producers' prices.
- 15/ 1970-2015  
Excludes travel agencies, includes publishing activities, computer and related activities and radio/TV activities
- 16/ 2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.

**Notes for Table 6.F. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity -  
Transport, storage and communication**

- 1/ 1970-2015  
Excludes travel agencies, includes publishing activities, computer and related activities and radio/TV activities
- 2/ 2006-2015  
Excludes travel agencies, includes publishing activities, computer and related activities and radio/TV activities
- 3/ 2000-2015  
Excludes travel agencies, includes publishing activities, computer and related activities and radio/TV activities
- 4/ 2010-2015  
Excludes travel agencies, includes publishing activities, computer and related activities and radio/TV activities
- 5/ 1990-2015  
Excludes travel agencies, includes publishing activities, computer and related activities and radio/TV activities
- 6/ 1970-2015  
At factor cost.
- 7/ 1970-2015  
At producers' prices.
- 8/ 1970-2001  
At producers' prices.
- 9/ 1970-1989  
At factor cost.
- 10/ 1970-2015  
Includes Taxes less subsidies on production and imports.
- 11/ 1970-1995  
At producers' prices.
- 12/ 1970-2015  
Excludes computer and related activities and radio/TV activities, includes travel agencies and landscaping care
- 13/ 2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.

**Notes for Table 6.G. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity -  
Other Activities**

- 1/ 1970-2015  
Excludes computer and related activities and radio/TV activities, includes travel agencies and landscaping care
- 2/ 2006-2015  
Excludes computer and related activities and radio/TV activities, includes travel agencies and landscaping care
- 3/ 2000-2015  
Excludes computer and related activities and radio/TV activities, includes travel agencies and landscaping care
- 4/ 2010-2015  
Excludes computer and related activities and radio/TV activities, includes travel agencies and landscaping care
- 5/ 1990-2015  
Excludes computer and related activities and radio/TV activities, includes travel agencies and landscaping care
- 6/ 1970-2015  
Includes Hotels and restaurants.
- 7/ 1970-2015  
At factor cost.
- 8/ 1970-2015  
At producers' prices.
- 9/ 1970-1989  
At factor cost.
- 10/ 1970-2015  
Includes Taxes less subsidies on production and imports.
- 11/ 1970-2015  
Excludes waste management.
- 12/ 1970-2015  
Includes repair of motor vehicles and motorcycles, personal and household goods.
- 13/ 1970-1995  
At producers' prices.
- 14/ 1970-2015  
Includes gas and water.
- 15/ 1976-2014  
At producers' prices.
- 16/ 1970-2015  
Excludes computer and related activities, includes travel agencies, landscaping care and veterinary activities
- 17/ 2014-2015  
Data for GDP and its components excludes the temporarily occupied territory of the Autonomous Republic of Crimea and Sevastopol.

**D. Implicit Price Deflators of  
Gross Domestic Product:  
Individual Countries or Areas  
(Index Numbers 2005 = 100)**

## Description of Analysis in Table 7

### *D. Price development expressed in terms of indices of implicit price deflators of gross domestic product*

This final section of the publication presents an analysis of economic development represented by the movements of prices and exchange rates in relation to economic growth for the years 1970, 1975, 1980, 1985, 1990, 1995, 2000 and 2005 through 2015.

In table 7, indices of GDP at current prices derived from GDP in national currency and US dollars are shown in columns 1 and 2. Column 3 shows the index of the volume of GDP in national currency. Column 4 presents indices of price deflators of GDP in national currency and column 5 includes indices of price deflators of GDP in US dollars. The price indices in columns 4 and 5 are obtained by dividing, respectively, the indices of GDP at current prices in national currencies and in US dollars shown in columns 1 and 2, by the volume indices presented in column 3. Column 6 provides an implied development in exchange rates derived either by dividing the GDP deflators in national currency (column 4) by the GDP deflators in US dollar listed in column 5, or by dividing the GDP indices in national currencies by the United States dollar indices listed in column 1 and 2, respectively.

To determine whether adjustments in exchange rates have been sufficient to reflect inflationary pressures in the economy, exchange rate movements in column 6 are compared with price changes in columns 4 and 5.

The data presented in the table reflect four different situations in countries. In the first group, the movement of exchange rates as calculated in column 6 is exactly the same as the movement of domestic prices reflected in the price indices presented in column 4. For these countries, there is no movement over time of the price index in terms of US dollars that is presented in column 5. In this case the growth of GDP in US dollars is not affected by domestic price changes as all domestic price changes have been eliminated through the movement of the exchange rate.

A second group of countries are those having fixed exchange rates. There is no movement

of the exchange rates in column 6 i.e., the index always remains 100. In this case all domestic inflation is reflected in the growth of GDP in US dollar terms.

In a third group of countries, the exchange rate index in column 6 is not fixed but lags behind the movement of domestic prices as reflected in the price indices presented in column 4. For this group of countries, the price index in terms of US dollars as presented in column 5 is higher than 100 and the countries' domestic inflation thus affects the growth of GDP in US dollars, though not to the extent that this was the case for countries with a fixed exchange rate. Only some of the domestic inflation is eliminated from the growth of GDP in US dollars through the movement of the exchange rates.

There is a fourth group of countries where the exchange rates overreact to the movements of prices in the domestic economy. For these countries, the index of exchange rates in column 6 is much higher than the price index in terms of national currency in column 4. This case implies that the price index in terms of US dollars as shown in column 5 is lower than 100 and this has the effect that the growth of GDP in US dollars is lower than GDP in national currency.

Again, a note of caution is advised when using the price index information presented in the table. For one, the deflators shown may not be fully comparable between countries because a wide variety of methods had been applied to obtain the data on price movements. To cite an example, for some countries, explicit price indices were used directly in the calculations while for other countries implicit price indices were derived by dividing volume indices into indices of current price development of GDP. Likewise, even as the index numbers are shown for a common base year 2005 = 100, GDP data at constant prices used in the calculations actually have been compiled according to different original weight base periods.
