

3.d Items for discussion and decision: Big data for official statistics

Page/Paragraph	Contents	Comments/Suggestions
Page 7/ Point 29	(c) on governance and leadership related to partnership and coordination between governments, private sector, NGOs, media and academia to promote good practices and principles in data sharing, open data, and data rights.	<p>BPS Statistics Indonesia collaboration with Ministry of National Development Plan on Progress build system and policy about “One Data”, that promote governance of data sharing, open data, and data rights. One data means One concept and Definition, One metadata, One portal data that open for another party, also One Code of Reference. One data also role about sharing data and open data / BPS Statistics Indonesia need technical assistance to share not 100% of data population but only “sample data dissemination”, with weighting of area that can also describe a whole population.</p> <p>Assistance also needed for best practice from statistical organization with international experience about “Clearing House” of data that provides which data appropriate for one indicator from several sources.</p> <p>With the assistance from UNDP-Jakarta, BPS-Statistics Indonesia will conduct Big Data Analytic Workshop (6-10 March 2017). The workshop is a training activities to learn big data analytic. In collaboration with the Ministry of Communication and Information Technology of the Republic of Indonesia (MCIT), BPS-Statistics Indonesia will conduct any study on the use of government big data analytic.</p> <p>TA is needed to standardize the process and results of collaborating many sources of data providers especially for fulfilling the requirement of SDGs Indicators Tier III.</p>
