

4.c Items for information: Health statistics

Page/Paragraph	Contents	Comments/Suggestions
Page 2/ Point 5	Report of WHO on progress of health data and health-related SDGs	Need support from WHO in relation to health data and health-related SDGs. Especially in implementing global standard. Moreover, more support is needed in synergizing health data between health sector and statistical office.
Page 3/ Point 14	The international Classification of Functioning, Health and Disabilities	<p>Related to disability survey, what is the difference between this classification and Washington Group Questions?</p> <p>When carrying a population census, which one should be used for asking question related to the disability?</p> <p>However, by considering implementation aspects, we suggest to use Washington Group Questions.</p>
