

4.i Items for information: Agricultural and rural statistics

Page/Paragraph	Contents	Comments/Suggestions
Page 4 / Point 6 The methodology will be finalized during the first quarter of 2017 and validated through large-scale field tests in Ghana before the end of 2017.	The field test should not only be conducted in Ghana but also in other countries to make sure that the methodology can be implemented across the countries after successfully being validated.
Page 6/ Point 13 , the data methodological proposal and data-collection strategies will be field-tested in selected countries	The selected countries should be more than one so that the result of the field-test will be able to be compared.
Page 7/ Point 14 , field-tested in selected countries and revalidated in the second half of 2017	The selected countries should be more than one so that the result of the field-test will be able to be compared.
Page 7/ Point 18	Volume 2 of the Programme,	This volume should cover topic on the possibility, the advantage, and disadvantage of using CAPI (Computer Assisted Personal Interview) for enumerating respondents. It is proposed to have Volume 3 which is a collection of the documentation of the implementation of the World Census of Agriculture of the previous round.
