

4.I Items for information: Common open standards for the exchange and sharing of data and metadata

Page/Paragraph	Contents	Comments/Suggestions
Page 4/ Point 17	UNSD is planning or conducting a number of capacity building activities in several areas. In SDGs, UNSD is about to launch a project, funded by the UK Department for International Development, which will establish SDMX-based dissemination and exchange of SDG indicators and metadata with 20 countries across Asia and Africa. As part of another large-scale project, Development Account 10th Tranche, UN Regional Commissions and UNSD will conduct a series of workshops and training events on SDMX implementation in the context of SDGs. UNSD is also undertaking a number of capacity building activities in conjunction with the implementation of SDMX for IMTS.	BPS Statistics Indonesia has developed a system information management of metadata, named SIRUSA (sirusa.bps.go.id) or system of statistical reference. Metadata classified into three categories: activity metadata, indicator metadata and variable metadata. Unfortunately, the metadata not on SDMX-based dissemination format. Capacity building to migration between metadata existing into SDMX format would be useful for develop standards for exchange and sharing of data BPS.
