2019-23-DemographicStats-EE/Page 2/Par. 2	2. The 2020 World Population and Housing Census Programme was approved by the Statistical Commission at its forty-sixth session and endorsed by the Economic and Social Council in its resolution 2015/10.....The Programme is aimed at ensuring that each Member State conducts a population and housing census at least once during the period 2015-2024 and disseminates the resulting census statistics on population and housing in as comprehensive and holistic manner as possible.	Indonesia will conduct Population Census in 2020 (PC2020). For several decades, Population Census in Indonesia carried out by using traditional methods. But, in the 2020, since the main objective of PC2020 is to achieve One Population Data and considering the different challenge in demographic characteristics and technology development than previous census period, PC2020 will be implemented by using combined method . This method is going to be carried out through the use of population administration data from the Ministry of Home Affairs.
2019-23-DemographicStats-EE/Page 2/Par. 5	5. Furthermore, the Statistics Division provided direct technical assistance to national statistical authorities in supporting the conduct of their respective population and housing censuses based on internationally agreed standards and methods.	Based on UN Manual Book on the Population and Housing Census, Combined method is used for bridging from traditional census to the registered based census. Some countries (including Indonesia) needs technical assistance to learn the most suitable business process.
2019-23-DemographicStats-EE/Page 2/Par. 6	6. Taking into consideration that the 2020 round of population and housing censuses will be substantially different in the role of contemporary technologies, primarily the use of	Indonesia is very welcome and exciting with the Guideline of Electronic Data Collection Technologies in Population and Housing Censuses. In accordance with the Guidelines, there are innovations implemented on the Population Census 2020

	<p>tablet computers and self-enumeration using internet.....finalized the initial version of the Guidelines on the Use of Electronic Data Collection Technologies in Population and Housing Censuses.....</p>	<p>(PC2020) that apply the latest technology. Especially in the data collection stages, we are planning to use multimode data collection:</p> <ul style="list-style-type: none"> a. Computer Assisted Personal Interviewing (CAPI) and b. Computer Assisted Web Interviewing(CAWI).
