

PANEL DISCUSSION: INNOVATIONS IN GENDER DATA

Side Event to the 50th Session of the
United Nations Statistical Commission

Wednesday, 6 March 2019

1:15 – 2:30 pm, Conference Room 7

The United Nations Statistics Division (UNSD), in collaboration with Data2X and UN Women, is organizing this panel discussion to present recent innovations in gender data to key partners from national statistical offices, civil society, relevant international organizations and the statistical community.

- Data2X will highlight the growing importance of time use data to inform policymaking and fill data gaps, in particular in women's and girls' time spent on unpaid work.
- UNSD will present its new initiatives on (i) modernizing time use data collection/use including on unpaid domestic and care work and (ii) measuring asset ownership from a gender perspective: findings from the EDGE Project.
- The national statistical offices of Kenya and Uganda will report on the progress achieved in improving gender data under UN Women's flagship programme *Making Every Woman and Girl Count*.

For additional information and questions, please contact Mehmet K. Sökeli at sokeli@un.org
