**United Nations Group of Experts on
Geographical Names
2023 session**

New York, 1–5 May 2023

Item 4 (a) of the provisional agenda*

**Reports: Governments on the situation in their countries
and on the progress made in the standardization of
geographical names****Standardization of Geographical Names in Japan****Summary****

In Japan, geographical names are collected, arranged and standardized by relevant governmental agencies to promote their administrative activities. As a consequence, the standardization of geographical names is a well-coordinated effort involving various related organizations that all have clearly defined tasks. Efforts towards standardization include the following: the standardization of geographical names of administrative districts; the unification of geographical names of natural features; the standardization of geographical names of undersea features; the adoption of Antarctic geographical names; and the national geographical names gazetteer.
