United Nations Group of Experts on Geographical Names

2025 session

New York, 28 April – 2 May 2025 Item 4 (b) of the provisional agenda *

Report: Governments on the situation in their countries and on the progress made in the standardization of geographical names

Report of Hungary 2023-2024

Submitted by Hungary**

^{*} GEGN.2/2025/1.

^{**} Prepared by Hungarian Committee on Geographical Names – Tamás Koós, Gábor Mikesy, Andrea Bölcskei, László Lippmann.

National report

A Summary

A short summary, which describes main points of the national report. This part is also usually sent in a separate document before the national report.

Operational framework: There have been no changes in the legislative background, in the composition of the Hungarian Committee on Geographical Names (HCGN) or in the officers. The governmental supervisory body for geographical name issues, the Department of Real Estate Registration and Cartography has been transferred from the Prime Minister's Office to the Ministry of Public Administration and Regional Development.

Activity: The HCGN holds four meetings per year as a rule, and has also made use of electronic discussion and voting in several urgent cases. Two thirds of the cases received by the HCGN concern public spaces and the parts of municipalities that have a role in the creation of addresses. Dozens of railway station names were decided. There is a growing trend towards the use of proper names for bridges. The Committee has prepared a comprehensive regulation of certain categories of names under its scope of responsibility: airports, bridges, nationality names. The collection and local coordination of map names at a scale of 1:10 000 is continuing.

<u>Country names</u>: In addition to a number of minor changes, one major change has been made to the official list of country names of Hungary: the form *Nagy-Britannia* ('Great Britain') has been replaced by *Egyesült Királyság* ('United Kingdom') as the preferred short variant.

International cooperation: Representatives of the HCGN followed the 2023 UNGEGN Session online, and they attended the 28th ECSEED meeting in Prague in May 2024 and the meeting of Working Group of Exonyms at the same time. We contributed to the content of the Slovenian-language map of the Slovenian minority area in Hungary, prepared by our Slovenian colleagues. Hungary has taken over the chairmanship of UNGEGN's Eastern, Central and South-Eastern Europe Division (ECSEED) from January 2025.

B Member state report on the situation in their country

The progress made in the standardization of geographical names since the last UNGEGN session (news in the field of geonames in the country, progress of ongoing projects, finished projects, issues and use cases for inspiration for other countries, changes in database of geonames).

Activity of the HCGN:

It has held 7 sessions since the last report in March 2023. It has discussed 87 items, and has taken 53 decisions. The decisions are available at the link below by selecting the paragraph "A Földrajzinév-bizottság döntései". These are currently available only in Hungarian.

https://kormany.hu/miniszterelnokseg/foldrajzinev-bizottsag

The majority of decisions concerned the naming practices by local governments, such as part of settlements, streets, small water features, etc. HCGN has prepared guidelines for local authorities on how to prepare a geographical naming decision.

Among the significant feature types, the importance of bridge names has increased. Although it is not mandatory for bridges to have a unique proper name, but there is a social demand for it. Previously there was no agreed procedure for the management and registration of bridge names. A new register of major bridges (named and unnamed) has now been established and and discussions are underway on name standardization with organisations responsible for building bridges. Names of new bridges over the river Ipoly/Ipel' forming the boundary between Hungary and Slovakia: *Szent Borbála híd* (HUN) / *Most Svätej Barbory* (SVK), *Szent-Iványi híd* (HUN) / *Most Szent-Iványi* (SVK). Some other notable new names: *Tomori Pál híd* (Danube/Duna), *Szent Márton híd* (viaduct, highway 86).

A new register of airports (public and private) has been created for standardization. The names of airports show irregularities and linguistic

errors due to irregular naming. Although HCGN is supposed to be responsible for naming and renaming, many airports use self-created names. HCGN has prepared a proposed name list for discussion with the transport authorities.

In order to promote the use of minority settlement names, the tables registering justified cases have been updated on the basis of the census 2022.

Gazetteer of Hungary:

The Gazetteer of Hungary database is maintained by the Department of Land Registry and Geodesy of Lechner Nonprofit Ltd:

https://lechnerkozpont.hu/en.

Both essential parts of the gazetteer are being significantly developed as part of the National Geoinformatic Basemap project. In the medium-scale part (1:50,000), the localisation (sometimes also the name form) is being revised on the basis of new mapping and statistical sources and through consultation with local authorities. The large-scale part (1:10,000) is in the process of digitising new field survey material.

The latest data on settlements and their parts can be found on the website of the Hungarian Central Statistical Office:

https://www.ksh.hu/apps/hntr.main?p_lang=EN

National Geoinformatic Basic Map Project (in progress): integration of thematic databases; of the 9 basic layers one is for geographical names. The level of detail is not limited. Availability is by arrangement.

Names of administrative units – County names:

The replacement of the term for the most important administrative unit "megye", with the term "vármegye" at all levels of use of names is underway.

<u>Issues to be resolved</u>: strengthening consistency across different geographic name datasets (statistical registry, naming of municipalities, nature conservation, water sector, etc.)
